

# Former Fullerton Man Killed When Plane Crashes

## JOHN S. MORSE AND PASSENGER MEET DEATH

John Spencer Morse, 26, formerly of Fullerton, and Dominick Gnoeff, of Los Angeles, were instantly killed yesterday afternoon when the plane was piloting crashed near the Lakeside Country club in Dark canyon, near Burbank.

Eyewitnesses said that a muffled explosion occurred and that immediately following a wing of the plane fell off, the rest of the plane making a spiral dive to the ground.

Frank N. Morse, father of the pilot, was notified, and had the body of his son taken to the Powell funeral parlors in Burbank. The body of Gnoeff also was taken there.

The Morse family formerly lived at 616 North Spadra road, Fullerton. The pilot with his wife and year old son lived with his mother, Mrs. Lottie E. Morse, at 2885 Tanabole drive, Altadena. He was a cousin of Mrs. Carl Thrasher and Horace M. Lee, of Santa Ana.

After an independent investigation of the accident, Curtiss-Wright company officials expressed the belief that what eyewitnesses reported as puffs of smoke was merely gasoline falling from the tanks and that the noise thought to have been an explosion was the snapping of the wing from the plane.

It was believed that the flight was to have been an attempt to cure Gnoeff of deafness. Investigators said that the plane was to have risen to an altitude of 15,000 feet and then go into a power dive. At the time of the accident, however, the plane was flying on a level plane at an altitude of approximately 2500 feet, eyewitnesses attested.

Morse, besides his parents, leaves his young widow, who was formerly Miss Maude Mueller, daughter of Mrs. Mae C. Mueller of Portland, Ore., and a 1-year-old son, John Morse Jr.; also a brother, Nathan Morse. Mrs. Lottie Morse, mother of the victim, was in Fullerton, and has been notified.

Morse was graduated from Oregon State college at Corvallis. He was a member of the Pi Kappa Alpha fraternity. His widow also was graduated from the same college, where she was a member of the Chi Omega sorority. She fainted when informed of her husband's death and is under the care of a physician.

## ANOTHER HEAT WAVE STRIKES MIDDLE WEST

CHICAGO, July 26.—(UP)—Another July heat wave was settled down over the midwest today, sending temperatures into the 90's and causing extreme discomfort in a dozen central states.

Three deaths were reported in the Chicago area, where even a cooling thunderstorm brought only temporary relief. The weather bureau here said the hot sunshine and sultry winds would continue over the week end, forecasting "fair and warmer."

Scorching temperatures were reported in Kansas, Nebraska and South Dakota where crops already were damaged by the heat. Except in scattered localities, high temperatures were reported from the Rockies east to Indiana.

Milwaukee reported three deaths after the mercury reached 90 at noon yesterday and the weather continued sultry through the night. Minnesota, farmers, in the rush of the harvest season, suffered greatly.

The high temperatures yesterday were reported at Yuma, Ariz., where the mercury climbed to 106. Among the cities where the temperatures reached 100 were Little Rock, Ark., Pierre, S. D., and Sioux City, Ia.

## S. A. BOULEVARD IS OPENED TO PUBLIC TODAY

(Continued from Page 1)

face of known protests that would follow.

Voters of the city supported the council members and retained them in office, the two men being Mayor F. L. Purinton, Stanley Good, W. J. Kelly, J. L. McBride and Homer C. Chaney. The latter resigned from the council soon after the election and was succeeded by Bert Sutton.

The new boulevard is a beautiful piece of concrete work, and has been built with sufficient strength to withstand heavy traffic for many years. It is 66 feet wide from curb to curb. An ornamental lighting system has been installed and will shed rays of light on the highway all night long.

Ornamental trees will be added, with a row of trees on the west side that eventually will close to the view of those traveling the route, the Southern Pacific tracks and right of way. The route shortens the distance to northern points by .61 of a mile, as compared with the present route by North Main street and Orana.

The complete cost of the improvements made in connection with the project will be \$348,400, the cost including also the work being done on Flower street to the bridge across Santiago creek.

Construction of three bridges were necessary to make possible the highway program as originally contemplated by the city council. Two concrete bridges and one wooden structure were constructed, the concrete structures being built across Santiago creek on Flower and Santa Ana boulevard and the wooden bridge was placed across the Santa Ana river.

Building of the latter bridge added to the legal troubles of the city in carrying out its plans for the boulevard, for property owners filed an injunction suit to halt its construction, plaintiffs alleging that it would menace their properties in times of flood by debris gathering at the bridge and clogging the flow of the stream, with consequent spreading of storm water over private properties. The suit still is in court.

In addition to offering a more direct entrance into the city from the north, the new boulevard presents opportunity for traffic to be distributed to North Broadway and North Flower streets, relieving possible congestion on North Main street.

At Birch park W. C. Jerome, president of the Chamber of Commerce, presided and introduced Mayor F. L. Purinton who delivered the address of welcome. He said:

**Mayor Speaks**  
"It is indeed a great pleasure to welcome you at this gathering of the opening of the Santa Ana Boulevard and it is certainly most gratifying to see the spirit of cooperation that the various cities and communities are displaying at this formal opening of one more link to the Manchester boulevard."

"I feel that the old saying about our dreams coming true is correct, as with many of us an artery of the vision for this city has been in our minds for many years and it is now no longer a dream but a reality."

"All of us who have the traffic problems to cope with at the present time realize that it is one of, if not the most important problem we have to handle. And there is only one way to handle the future traffic and that is wider and better highways."

"There has been great progress made in the past few years in the improvement of highway construction, as no doubt our speakers will tell you and with the ever increasing traffic, it behooves us to do our utmost to handle this situation to take care of the future increase in traffic."

"The city trustees of Santa Ana hoped at the time this work was ordered to obtain a percent of the money paid by the city to the county and state in gas tax and had we been able to do this, this boulevard would have been paid for without any direct tax on the people and we are still hopeful that the county officials will see fit to make an equitable division of these moneys with all the cities in the county."

Upon behalf of the City of Santa Ana, I most heartily welcome you to this dedication."

Mayor Purinton was followed by Bert Meek, who spoke as follows:

**Meek Gives Address**  
"Orange county occupies a very strategic position in the state highway system as now constituted, and an even more important position in the future roads to be taken into the state highway system. While the state has been rapidly increasing the width of the state highways in Orange county, traffic increases have been so rapid that it has become apparent additional roads are necessary. Exhaustive engineering

## OFFICIALS AT OPENING

Left, below, W. C. Jerome, president of the Chamber of Commerce and right, Clyde L. Jenken, city engineer, both of whom took active part in the opening of the Santa Ana Boulevard which was officially thrown open to the public today.

studies made throughout the state indicate that in justice to the counties, and in order to properly round out the state highway system, certain county roads should be added to the state system, thus relieving the counties of the cost of maintenance of these particular roads. Orange county especially is found to be the beneficiary of this study, and we are very glad to be able to announce that our recommendation for additions to the state highway system, which will be made to the next session of the legislature, includes two very important roads leading into Orange county. One is the road from San Bernardino to Newport Beach via the Santa Ana canyon, and the other is the important road from Pomona to Fullerton.

"Both of these roads were found to be carrying a predominating percentage of state traffic. Provision for financing the cost of improving these roads will be recommended in the budget which is now being made up, and if adopted by the Legislature, work can begin next spring."

"The state has also been able to give substantial aid to the joint highway district project now under construction in Orange and Riverside counties, known as the Ortega highway."

**Funds Budgeted**  
"Funds for construction of state highways are budgeted for biennial periods, and I am very happy to be able to say that while the biennial period is just half over, over 80 per cent of the budgeted funds have been expended or contracted for. The big highway building program in Orange county has been made possible by the one cent gasoline tax which was sponsored by Governor Young, and it is our hope that no major change be made in the gas tax law which is now operating so wonderfully well. If the present gas tax is not disturbed, California will soon have the greatest system of highways of any similar area in the world."

"I am particularly happy to be able to congratulate the citizens of Santa Ana on their vision in the planning and construction of this great artery leading direct from our state highway into the center of the city. This kind of vision on the part of the city of Santa Ana is typical of the vision which was shown by Orange county in road matters. Orange county in 1913 was a pioneer in voting bonds for improved highway purposes, voting a bond issue to the limit of their financial ability at that time. Experience has fully demonstrated that the vision shown by this county at that time more than justified the expenditure. Surely this county's remarkable growth in population and wealth may be traced in some degree at least to the early improvement of its roads."

**Underground Water Reservoir**  
"California is of necessity semi-arid. This makes it necessary to develop and conserve water to the fullest extent. The most valuable thing you have in Southern California is your water. My department is now engaged in making a survey of all the streams in the southern part of the state and we are particularly interested in studies that have been made along the Santa Ana river."

"We find that there is a lack of proper surface water reservoir sites. We have also found that water can be stored in underground reservoirs and at not excessive costs. We are now engaged in designing and planning a method of financing these underground stor-

age reservoirs. This is a promise that is of more than state importance and we have persuaded the federal government to the extent that it is assisting in the survey work making expenditures of \$200,000 before the first of the year."

**Park Program**  
Ceremonies at Birch park, where Meek's address was delivered, began with several selections from the Santa Ana Municipal band under the direction of Caesar Clanton, and continued with a speaking program in which W. C. Jerome, president of the chamber of commerce, Frank Purinton, mayor of Santa Ana, J. P. Baumgartner, member of the state highway commission, Meek, and Samuel Dulex, of South Gate, president of the Manchester boulevard association, participated.

Jerome called attention to the fact that this was a day of rejoicing for Santa Ana, a day when dreams of the past were realized, and that at the same time other forward steps were being taken including the erection of several fine buildings in the business district.

The Mayor extended a welcome to all visitors as well as residents of the city, who had gathered to assist in celebrating the opening of the fine boulevard. He declared that the spirit of cooperation expressed by other cities was very gratifying. Traffic problems are among the greatest of the day and wider and better roads are required to carry the constantly increasing flow of cars, he asserted.

J. P. Baumgartner expressed the greetings and congratulations of the state highway commission on the project which is just completed and characterized it as the finest piece of constructive planning in connection with state highway problems that the commission knew of anywhere in the state. "Santa Ana has solved here in a most admirable manner for the entire state the problem of ingress and egress of traffic to and from a populous city," he said. "It is just a question of time until the boulevard will be extended to First street. This is inevitable."

He characterized Meek, whom he presented to the audience, as one of the most efficient public officials in the state, and declared that the office of director of public works was the biggest and most important job in the state next to that of governor. He asserted that Santa Ana was complimented in the appearance of Meek at the occasion.

Dulex, whose talk closed the program before the city officials and invited guests of the chamber of commerce adjourned to the luncheon in connection with the celebration, stated that the Manchester boulevard project was another great dream which was coming true and that they were glad to have Santa Ana and Orange county become interested in this great highway.

**LITTLE HOPE FOR PHELAN**  
SARATOGA, Calif., July 26.—(UP)—Physicians attending former U. S. Senator James D. Phelan told the United Press today there was little if any hope for his recovery.

"Senator Phelan has shown no improvement," said Dr. Jau Bon Ball, his personal physician.

Dr. Louis Mendelsohn, consulting physician said:

"Senator Phelan's condition is a matter of grave concern."

## Have You Planned Your Pest Control Program Properly?

An undertaking upon which the success of a year's work depends should be carefully planned in advance with all factors given serious thought.

Pest control is one of the important practices of citriculture, if not one of the most important. Now is the time every grower should give careful consideration to his scale control program and consult freely with his district inspector, agricultural commissioner and pest control operator.

Bear in mind that the time proven method of FUMIGATION is the standard by which results of all other methods are judged.

## DEATHS

### A WORD OF COMFORT

What your spirit craves is not change, but development. It is unthinkable that you should be changed into a different person. What you need and desire is to develop the capacity later with God. You are to live into the service for which God needs you and to progress into such oneness with purpose that you will be ready to rejoice your dearest one who now lives close to Him.

DAVIS—Morgan M. Davis, aged 72 years, passed away July 25. He is survived by a daughter, Mrs. D. H. Huffman, of Laguna Beach, and two sons, Lee E. and Richard A. Davis, of Deming, New Mexico. Shipment of his remains today from the Winbiger funeral home to Deming, where services will be held and interment made.

(Funeral Notice) Services for Mrs. Caroline T. Egge, of 815 Miller street, who died July 25, are to be held from the Winbiger funeral home Monday, July 28, at 2 p. m. The Rev. B. Dudley Snudden, of Fullerton, officiating. She was the wife of Herman Egge and mother of Mrs. G. H. Campbell, of Redlands. Interment will be in Fairhaven cemetery.

MOORE—Near Westminster, July 25, 1930, Raleigh E. Moore, aged 47 years, of Long Beach, Calif. Funeral services will be held Monday at 10 a. m. at the Sunnyside mausoleum, Long Beach, with Smith and Tutthill in charge.

LEONARD—Helen Mae Leonard, aged 18 years, daughter of Mr. and Mrs. Frank H. Leonard, of East Seventeenth street. Funeral services will be held Monday at 2 p. m. from Smith and Tutthill's chapel, the Rev. O. Scott McFarland officiating.

## 'SATISFACTORY' OF GOOD LIFE' TOPIC AT PARK

Tomorrow evening brings the opening of the annual series of united services held by the churches of Santa Ana.

At 5 o'clock there will be a vesper service at Birch park, which is to be addressed by the Rev. W. G. Nicholson of Cambridge, Mass. The Rev. Mr. Nicholson is filling the pulpit of the First Congregational church during the absence of the pastor, the Rev. Perry F. Schrock, and he is winning many friends by his preaching. He has selected as his theme for the service at Birch park, "The Satisfaction of the Good Life."

Maurice C. Phillips will be the soloist for this occasion, with Harry Garstang accompanying. At 7:30 o'clock there will be another union service, this one to be held in the First Presbyterian church.

The Rev. W. H. McPeak, pastor of the United Presbyterian church, is to deliver the sermon, and Clifford Johnson will sing, while Harry Wayne will be at the organ.

The purpose of these services is to bring the people of Santa Ana together for worship and inspiration, and the invitation is extended to all people, of all churches, and of no church connection, to attend and enjoy the occasion. Each service is scheduled to last for just one hour, starting promptly and closing as promptly.

The Ministerial association of the city has charge of the union meetings, which will continue through the month of August.

## SAYS McDONALD WAS BRIBED TO RECAP STORY

(Continued from Page 1)

mite at the scene of the explosion, July 22, 1916.

"My hope is that I'll be permitted to cross-examine MacDonald," Flickert declared.

MacDonald was Flickert's star witness against Billings and Mooney and in Tuesday's hearing he will repudiate all his testimony.

The charge of bribery came dramatically. Questioned as to MacDonald's motive unless he is telling the truth now, Flickert exclaimed:

"You want to know MacDonald's motive for the repudiation? I'll tell you," he almost shouted. "I'll tell you in one word—jack."

"In 1916 he didn't have any motive," Flickert said. "A man doesn't have a motive 10 minutes after he sees something. He told a saloon-keeper his story 10 minutes after the explosion. We checked up on that and found it to be true."

He denied that he had said to MacDonald, as the latter declared in his affidavit made July 12 in Baltimore, "now those are the two—you are to get. You will be well paid for it."

Flickert said he intended to confront with all of his former assistants in the prosecution's Fred before the hearing, including Fred L. Berry, Edward Cunha, James F. Brennan and Louis Ferrari.

The questioning of MacDonald Tuesday, it was learned, will be done by the seven justices themselves. Berry, selected to represent the people, will merely supplement the work of the jurists who will themselves conduct the direct examination of MacDonald.

(Funeral Notice) Services for Mrs. Caroline T. Egge, of 815 Miller street, who died July 25, are to be held from the Winbiger funeral home Monday, July 28, at 2 p. m. The Rev. B. Legal Notice

NOTICE OF FILING ASSESSMENT FOR THE WORK OF IMPROVEMENT ON LOWELL STREET AND RUSSELL AVENUE, PROVIDED FOR BY RESOLUTION NO. 2166, PASSED FEBRUARY 23RD, 1930, AND OF THE TIME OF HEARING AS TO SAID WORK AND SAID ASSESSMENT.

The undersigned, the City Clerk of the City of Santa Ana, State of California, hereby gives notice that on the 24th day of July, 1930, the Superintendent of Streets of said City having made an assessment to cover the sum due for the work performed and specified in the contract made under proceedings of Resolution of Intention No. 2166, passed February 23rd, 1930, filed the same with me, I hereby fix August 11th, 1930, at the hour of 7:30 o'clock P. M. as the time, and the Council Chamber of the City Hall of said City, as the place where and when all persons interested in the work done thereunder or in the said assessment will be heard by the City Council. This notice will also be published by the undersigned twice in the Santa Ana Daily Evening Register, a newspaper published in said City. The owners, contractor or his assigns, all other persons interested in the said work or in the said assessment feeling aggrieved by any act or determination of the Superintendent of Streets or the City Engineer in relation thereto, or who claim that the work has not been performed according to contract in good and substantial manner, or who claim that any portion of the work for any reason was omitted or illegally included in the contract for the same, having or making any objections to the correctness of the assessment or diagram or other act, determination or proceeding of the Superintendent of Streets or City Engineer, shall prior to the day fixed for the hearing upon the assessment appeal to the City Council by briefly stating in writing the grounds of appeal.

For a description of the said work, reference is hereby made to the above mentioned Resolution No. 2166, (Seal) E. L. VEGELEY, Clerk of the City of Santa Ana and the City Council thereof.

## Traffic Officers Home From State School In North

D. D. Adams, Harry Aldrich and Oscar Kelly, Orange county state traffic officers, returned to Santa Ana this morning from Sacramento, where they have been for the past two weeks attending the California highway patrol school for state officers.

All three men made exceptional high grades in the test at the school.

Capt. Henry Meehan, who leaves today for a two weeks vacation at the beach, said that he had not received any further orders regarding the sending of more officers from here to the school.

## DEATH OF BEACH TRUCK DRIVER HELD ACCIDENT

Rowley E. Moore, 47, Long Beach truck driver, who was burned to death at 3 o'clock yesterday morning when his 20-ton truck ran off the road and caught fire in a ditch three miles west of Westminster, came to his death in an accidental manner, according to the verdict of a coroner's jury, which held an inquest over the body at the Smith and Tutthill funeral parlors this morning.

Due to the charred condition of the body, which was dug up by officers and firemen at the scene of the wreck, under a huge pile of thousands of cans of tuna fish which completely buried him when the truck ran into the ditch, complete identification was impossible, but enough evidence was produced to show that Moore was the only man on the truck at the time of the accident.

Moore's daughter, Miss Pauline Moore, 23, who works at 1120 Twentieth street, Santa Monica, was one of the witnesses. She described the family life and said that he was survived by one other daughter, Wilda, 15, who resided with the father in Long Beach.

E. B. McClure, of the Interstate Transportation company, Long Beach, owner of the truck and employer of Moore, testified that there was 10 tons of canned tuna on the truck at the time, together with approximately five tons of empty tuna fish cans.

He testified that he saw Moore in San Diego on Thursday at which time Moore was preparing his load which he expected to deliver to Long Beach. This is the last time he was seen alive.

McClure testified that Moore had been in his employ for the past year and a half and that he had driven the truck to and from San Diego from Laguna Beach every other day during that time. Moore was regarded as his most dependable employee, he said.

It was the general opinion of the coroner and other officials that McClure went to sleep at the wheel, allowing the truck to run off the road.

## MILTON YOUNG RETIRES FROM G. O. P. CONTEST

(Continued from Page 1)

tain papers supporting the candidacy of Governor C. C. Young to the effect that the tender and my acceptance of the Republican nomination was a sure and delusion."

At the time of the complaint by the friends of Governor Young, the statement read, Milton K. Young did not feel that the ground was well taken.

His Primary Law

"I felt that the primary election law was a sure and delusion," Young said. "It has proved a great boon to those Republicans holding congressional offices for long terms of years. These candidates have run upon both tickets and by reason of publicity which their incumbency in office has given them, have defeated Democrats who were entitled to the nominations."

Young said his entry upon the Republican ballot was made primarily to bring the attention of the people to this primary law.

"I have given very careful consideration to the possibility of my name confusing the electorate in the Republican primary. Recently I found that many persons believe that Milton K. Young is now the governor of California and intend to vote for him under that belief. I can account for this view only by reason of the fact that my name and the name of C. C. Young have long been before the public in this state. It is not a case of two C. C. Youngs running for the same office but it seems that those two well-known names are interchangeable in the minds of a good many persons, hence confusion."

For the reason mentioned, I am satisfied that if my name remains upon the Republican primary ticket, it will cut into the vote of Gov. C. C. Young in an unfair and unwarranted manner. I do not intend to profit by any such untoward circumstances nor can I conceive that either of Governor Young's two Republican opponents should desire so to do."

Leon B. Toms, et al, is named as defendant in a suit that has been brought by the Bear State Lumber company, in which judgment for \$882.74, the balance alleged to be due and unpaid for materials used in the construction of a house at Garden Grove, and foreclosure of a mechanic's lien, is sought.

B. R. Campbell, electrician of Laguna Beach, filed a claim for a lien in superior court yesterday afternoon. The plaintiff is asking judgment for \$978.07 of Bruce V. Crandall, which amount is alleged to be due and unpaid.

The plaintiff claims to have put in work and certain fixtures for the defendant amounting to the sum stated in the suit.

Bert Cowan, Santa Ana man, charged with defrauding an innkeeper, was released on his own recognizance from Justice Kenneth Morrison's court this morning after his trial was set for August 6 at 9 a. m. Cowan is said to have defrauded the Palace rooms in Santa Ana.

E. C. Posey, 30, charged with contributing to the delinquency of a minor, went to the county jail yesterday afternoon to serve a 90-day sentence. Posey was charged with beating his 11-year-old stepson on May 2, and pleaded guilty to the charge, asking for probation. His application for probation was heard before Judge G. K. Scovel yesterday and was granted on condition that he serve 90 days in the county jail.

All former residents of Logan county, Colorado, are invited to attend the semi-annual picnic which will be held in Bixby Park, Long Beach, Sunday afternoon, August 3.

Local Briefs

The Weaver-Jackson company, operator of beauty shops in a number of Southern California cities, is entering Orange county with several shops, it was announced today. Announcement of locations will be made later. The firm has 15 shops in Los Angeles, Hollywood, Beverly Hills, Culver City, Alhambra, Glendale, Pasadena and Long Beach. The company has been in business since 1937.

## Court Notes

Judgment in the amount of \$3070.07 plus costs and attorney fees of \$160 was awarded to J. E. Park, et al, following the hearing of their action against Andrew Cock, et al, by Judge James L. Allen yesterday afternoon. The action was based on a note and mortgage.

Judge G. K. Scovel yesterday signed an order approving a compromise settlement of the claim of Margaret E. Russell, 20, against R. L. Philippi. The order followed a petition filed with the court by Wayne E. Russell, the girl's father, and resulted from injuries sustained in an accident north of Santa Ana last November. The court order requires Philippi to pay \$500 in full settlement.

The present jury panel was discharged from service yesterday by Judge G. K. Scovel, it having completed the term for which it was drawn. The new panel will report for duty on Monday, Aug. 4.

## REBEKAHS OF ORANGE ASSIST GILROY LODGE

ORANGE, July 26.—Sewing was done for the Odd Fellows Orphan Home at Gilroy by the Past Noble Grand's Association of the Ruby Rebekah lodge in the L. O. O. F. hall yesterday. Sewing began at 10 o'clock and with the use of a basting machine and an electric sewing machine ten attractive frocks were nearly finished.

A pot-luck dinner was served at the noon hour with fish as the main course. The business session was called to order by Mrs. Ruby Lytle, first vice president, and a meeting was planned for the last Friday in August to complete the dresses ready for the opening of school in the fall.

The fourteen members present were Mesdames Alice Shell, Ota Harris, Lucy Richards, Mary Wood, Etta Cavett, Fanny Barker, Lydia Jones, Ida Davis, Katie Heitshum, Ella Hight, Jane Chandler, Ruby Lytle, Mary Edwards and Miss Helen Kroener.

## LOVELY SHOWER HELD IN HOME OF DES LARZES

ORANGE, July 26.—One of the loveliest social affairs of the week was the shower given in honor of Mrs. Charles Virgoe with Mrs. Leon Des Larzes and Mrs. Arthur Fullerton as co-hostesses at the Des Larzes home, 247 North Cleveland avenue.

Zinnias in shades of rust and red were used in the decorations and these colors were used in carrying out the decoration when a delectable ice course was served.

Amusing contests were the diversions of the evening and prize winners were Mrs. Dayton Ditchey, Mrs. Ross Atherton, Mrs. Logan Jackson, Mrs. Sadie Sweet and Miss Leona Freeman. One of the games was invented by the hostesses especially for the occasion and was played with tiny cubes of wood on which the word "Virgoe" was printed. Mrs. Virgoe is the past president of the Missionary Guild of the First Christian church and the greatest number of the guests were members of this organization.

At the close of the evening Mrs. Virgoe was presented with a basket heaped high with dainty gifts. Those present were Mesdames Dayton Ditchey, Robert Robinson, Ross Atherton, Robert Winters, Logan Jackson, Ralph Goddard, Malcolm Kilgore, Sadie Sweet, Clara Vestal, Glenn Reck, L. F. Finley, Thomas Hight, Gladys McDonald, Floyd Owings, Ross Harlan, Leonard Cole, Ray Lyon, Neleta Wolfe, Walter Crane, Franklin Minck, Walter Kogler, Arch Burkett, and the Misses Idabel Durgan, Bernice Vestal, Leona Freeman, Tefa Conner and Sue Rankin.

It is believed that the reign of Papi II of the sixth Egyptian dynasty is the longest on record. He ruled for 91 years.

Mr. and Mrs. W. A. Gill and family visited relatives at Fullerton Sunday.

Miss Mabel Woodworth who is attending U.S.C. summer school spent the week end with her parents, Mr. and Mrs. J. W. Woodworth. Mr. and Mrs. B. Heber Nichols and daughters, Betty Joe and Frances Jean, moved Friday to Inglewood where they will make their home. Mr. Nichols has purchased a drug store at that place.

Mrs. Clara Darby and children and Mrs. Elmer Launders and two sons spent Friday at Long Beach.

## BANK OF ITALY OPENED TODAY FOR INSPECTION

ORANGE, July 26.—Large crowds were in attendance at the opening of the Orange branch of the Bank of Italy here today, when the bank was formally opened to visitors following the remodeling of the structure which occupies the lower floor of the Masonic temple on the corner of North Glassel street and the Plaza Square.

The building was remodeled at a cost of about \$6000 and the interior has been redecorated and the fixtures rearranged. The walls are finished with a Tiffany finish of softly blended shades of tans and gold. The floor is laid with linoleum in cream and brown and fixtures are of mahogany. Offices and counters have been moved from the north side of the building to the south side where five windows have been put in, with two new windows on the east side. The front entrance was also completely rebuilt.

Additional safety deposit boxes have been installed and the most modern of bank equipment installed. Ray C. Raddant is the manager of the Orange branch and Jay Brown is the assistant manager.

Several of the officers of the Bank of Italy in Los Angeles were present at the opening today. These included H. A. Nates, vice president, and R. D. Gordon senior controller.

Flowers were presented to women visitors and cigars to men inspecting the building.

## Chino Visitor Has Clothing Pilfered

ORANGE, July 26.—V. M. Parker of Chino, reported the theft of a number of shirts, underwear, baby clothing and shoes when he parked his car while he attended a theater here this week, according to a report at the police station yesterday.

Parker is visiting Bruce Richards, 144 South Orange street.

## Building Permits Issued to Woman

ORANGE, July 26.—Two building permits were issued here yesterday to Mrs. Mary L. Speer, who will erect a frame house to cost \$1200 at 134 South Pixley street and who will remodel a residence at 138 South Pixley street at a cost of \$500.

## OLIVE

OLIVE, July 26.—The Sew and Sew club met at the home of Mrs. Herman Meierhoff Thursday afternoon. Mrs. Emma Brelje, Mrs. Henry Heinemann, Mrs. Arthur Brelje, Mrs. Ed Meierhoff, Mrs. Fred Guenther, and Mrs. C. Otto were the members present. Guests of the club were Mrs. Herbert Meierhoff, Mrs. Walther Otto, and Mrs. Raymond Meierhoff.

Mr. and Mrs. Walther Otto and daughter, Marlene, left Thursday evening for Huntington Lake, where they will spend a few days with Mr. and Mrs. Howard Nelson, and then drive on to spend several days in Yosemite National park.

Mrs. C. O. Heim was pleasantly surprised for her birthday Friday evening when the following relatives and friends gathered at her home for the evening: Mr. and Mrs. Albert Huhn and family of Orange, Mr. and Mrs. Robert Paylus and family, Mr. and Mrs. H. G. Heinemann, Mr. and Mrs. William F. Paulus and daughter, Joyce, Miss Lena Grote of Orange, Miss Katherine Michel, Bill Dutton, Florence, Esther, Elmer, and Victor Heim, and Mr. C. O. Heim. ## The Best Yet In Gliders

The PLAYBOY FOLDING GLIDER is shot straight up 100 or 150 feet by a special rubber. This is possible because in the folded position it goes up like an arrow. The air holds the wings folded until the glider reaches the pinnacle, when they open. It will then make one loop and gradually circle and glide to the ground.

## Provides Hours of Fun

As the PLAYBOY GLIDER does not depend upon a small propeller and lightness to lift it into the air, it is made very sturdy. The wooden nose protects it if shot head on into a wall. If a wing hits any obstruction, it simply folds back and after freeing itself the wing opens and continues its flight.

# W. C. T. U. HEADS IN STATEMENT ON YOUNG AID

A statement of the action of the state executive committee of the W. C. T. U. in endorsing the candidacy of Governor C. C. Young for re-election was given out today by the committee for Orange county, composed of Estelle Harper, Minnie Bayville, Pearl Kendall Hess, Amanda A. Jones, Evangeline Courtney and Elizabeth Warren.

The statement follows: "The state executive committee consists of 69 voting members. Every member received an official notice of the meeting to be held at Pacific Palisades July 17. A letter was sent each member on July 12 by the state president, Mrs. Eva C. Wheeler, asking that she be much in prayer and come in the spirit of prayer. This letter also stated: 'At the state executive meeting we have a tremendous responsibility in deciding what the W. C. T. U. of Southern California will do regarding the candidates for governor.'"

"Wednesday was W. C. T. U. day at Pacific Palisades. Governor Young and Byron Pitts were both given a hearing. Practically all members of the executive committee heard both candidates. "Thursday at 9 a. m. the executive committee met with 45 voting members present. One half hour was spent in prayer asking for guidance in this critical situation. Practically the entire day was given to consideration of the candidates for governor. Both sides were heard. Every one spoke as often and as long as she wished. It was a dignified and deliberate discussion lasting many hours. About

4 p. m. the president asked if all had spoken who wished. Ample time was given to any one to say a final word. No one rose to speak.

"The following motion was then made: That the state executive committee stand with other dry organizations and endorse the candidacy of C. C. Young for governor."

"A rising vote was called. Thirty-five voted in the affirmative and four in the negative; six members not voting.

"Released publicity from Los Angeles states: 'Not more than half the board members were present.' This is not true, as 45 were present, out of 69.

"No attempt was made to deliver to the Young camp by the state officers any union or individual."

"This action was taken because the objective of the dry forces is to defeat Ralph, the avowed wet candidate for governor, which cannot be done by a division of the dry vote."

## CHURCH SECURES SITE ON HICKORY

The Reformed Presbyterian church has secured a new location at the corner of Myrtle and Hickory streets and the basement is now ready for the transfer of the building. The movers, Mordie and company, Fullerton, are already at work. During the transfer of the building the congregation will hold services in the Adventist church, corner Fifteenth and Sycamore streets. There will be only the morning service during the summer. It is hoped that in three weeks the congregation shall return to their own building on the new site.

The present building, First and Spurgeon streets, was erected 25 years ago under the ministry of the Rev. G. N. Greer.

## Court Notes

Charged with being drunk, J. Orano was fined \$15 in the city police court yesterday.

W. S. Rose, Santa Ana, was fined \$2 on a charge of overtime parking in police court yesterday, and Wallace O'Brien, charged with ignoring a boulevard stop, also was given a \$2 fine.

W. C. Emerick, of Anaheim, pleaded guilty to a speeding charge in Judge Talbot's police court yesterday and drew a fine of \$10.

Frank Duran, Santa Ana, charged with reckless driving after the charge had been reduced from driving an automobile while under the influence of liquor, was fined \$25 in police court yesterday.

For use in model airplanes compressed air motors of six and eight cylinders and weighing only four and six ounces, respectively, have been developed.

# SLEEPER TELLS OF RECORD IN COUNTY OFFICE

Pointing to his record, which carries notation of only 35 changes made in his assessment valuation during the past two decades, declaring that the authority for fixing valuations on property for purposes of taxation is specifically vested in the assessor and no other person, and asserting that a reasonable increase in the assessor's allowance will make it possible for his office to do the work, James M. Sleeper, county assessor, today issued formal announcement of his candidacy for re-election. Sleeper also called attention to the fact that he has resided in the county for 42 years, was an active farmer for 30 years and knows the value of land and the location of the good and poor lands.

His statement follows: "In asking your support for the office of county assessor, I do so with a feeling that I have tried to do my duty as assessor by giving every taxpayer a just and equitable assessment and by endeavoring to keep the assessments at a reasonable basis, as this office is the only bumper between the taxpayer and the state spender. The assessor has nothing whatever to do with the fixing of tax rates, that being done by the supervisors, school trustees, city trustees and special district trustees, his only duty being to place values on all property and collect unsecured personal property taxes.

Points To Record "I point with pride to my record on assessments as there have not been 35 changes by the board of equalization in the past 20 years, which record can not be claimed by another county assessor in the state with as large a population in their county as we have.

"My opponent for this office is in favor of a revaluation of the county, which would be a fine thing for a new man to have when just coming into the assessors' office, relieving him of his responsibility as to assessed values, the board of appraisers doing that for him. The valuation fixing authority on property for purposes of taxation is conferred by the constitution, the codes and the decisions of the courts, specifically upon the assessor, and the assessor cannot, under the provisions of the constitution, the codes and the decisions of the courts, delegate the valuation fixing authority to anyone. Why have an assessor if you are going to have an expensive board of appraisers to do his work? Cost of \$350,000

"The supervisors of San Diego county had a revaluation of all property at a cost of over \$350,000 and are still employing five extra men on this work. The late board of equalization of San Diego county had 237 complaints against 21 in Orange county. The Orange County Farm bureau sent a committee to San Diego a few months ago to investigate this work and in their report they stated that 25 per cent of the assessments were wrong.

"San Francisco county supervisors at a cost of over \$225,000 had a revaluation of the city and county in 1927 and 1928, and in the Journal of Proceedings of the board of supervisors of the city and county of San Francisco on page 779, dated March 3, 1930, they say that have never utilized these appraisals as the market value of property had diminished so much that they are of no value. Alameda county had a revaluation of all property at a cost of nearly \$200,000 and they have never used the figures set up by the appraisers.

Complimented by Jury "I do not think the taxpayers of Orange county want to go to an expense of over \$100,000 to try this experiment, and all I ask is reasonable increase in the assessor's allowance for assistants so as to be able to handle the real estate values the same as I do the buildings and trees in the county. I have had the best men available for this work and was complimented by the last grand jury on their work.

"The voter and taxpayer has a great many things to consider before making a change in the assessor's office, for instance, the oil industry with an assessed valuation of fifty million dollars, being over 25 per cent of our total assessment for county purposes. I was the first assessor in the state to get up a production form by which the oil companies are required to fill out, giving their production of all oil and gas produced from each lease. This form is now used by all the assessors of the state who have oil properties in their counties. I was the first and only assessor in the state as far as I know who sent ex-service men their blank forms to fill out for tax exemption the first of March each year so that they will not forget to file the same before the first Monday in July as the law requires.

"You have your choice of two candidates for the assessor's office, one who has resided in the county seven years with no experience in the assessing of property, and one who has resided in the county 42 years, an active farmer for 30 years and who knows the value of land and where the good and poor lands of our county are located, and who has been your

## HIGH RATING IS GIVEN GUARDS OF SANTA ANA

Army officers inspecting the companies of the third battalion of the 158th regiment, California National Guard, in camp at San Luis Obispo, gave Company L a rating of excellent, according to the Register's correspondent at the camp.

Company M, San Bernardino, was given the highest rating, "very excellent. Rating of other companies was as follows: Company I, Orange, very satisfactory; Company K, Riverside, fair; headquarters company of battalion, Santa Ana, very satisfactory.

Sergeant Gene Johnson of the Santa Ana company was singled out of the entire regiment as having the neatest pack.

The 7th brigade moved out of camp Thursday noon to go into bivouac. All men were under full pack, having their homes and blankets right on their backs. Both Santa Ana companies were in the field Thursday night.

## 6 DEGREES OF DIVORCE GIVEN IN COURT HERE

The bonds of matrimony were officially severed for six couples yesterday afternoon as a result of hearings in superior court on divorce complaints that were set for trial. Five interlocutory decrees were granted by Judge L. Allen and one by Judge G. K. Scovel. All cases were uncontested by the defendants.

Glenn G. Hoskins was deserted by his wife, Gladys, he told the court at the hearing which won a decree for him.

Desertion and failure to provide was the charge presented by Adeline Clauson, whose petition showed that her husband had left her just one month and 18 days after their marriage on March 1, 1929.

Willful neglect, failure to provide and desertion were the charges brought before the court by Ruth P. Hill in her action against Wilbur Hill. They were married in Nebraska in 1922 and separated in 1929. Mrs. Hill declared that her husband deserted her by treating her so cruelly that she was forced to leave the family home.

Custody of their five children and an order for the defendant to pay \$60 per month for their support, accompanied the decree awarded by the court to Rhoda V. Taylor from George M. Taylor. Cruelty was the charge that resulted in breaking ties assumed a little over 22 years ago.

Ether Nieblas, who told the court that her husband, Ernest Nieblas, deserted her the day of their marriage in 1927, was also given a decree.

Desertion and willful neglect were allegations of Carrie D. Archbell, that resulted in getting a decree from Charles C. Archbell. They were married in North Carolina in 1926 and only lived together three months and one day.

assessor for the past 20 years. My by the taxpayers of Orange county record as assessor is well known to and I am asking your support on this record."

All Cases Receive My Constant Personal Attention. No salaried assistant doctors.

# IMPERIAL ROAD HELP PROMISED IN MEEK'S TALK

State aid for the Imperial highway was promised by B. B. Meek, state director of public works, at the July meeting of the Imperial Highway association, held in Yorba Linda Friday night.

"The state is interested in joint highway projects," said Meek, "and such roads will eventually be taken into the state system if enough traffic goes over them to warrant it. I shall be glad to help your road in any way.

"State roads are being constructed and maintained by the gas tax and this system must not be disturbed in its major elements, for by it we are constructing the finest system of roads in the world; any change in the gas tax will cause a complete collapse of the system.

"Another point of state interest is the elimination of grade crossings and 28 crossings have been made safe during the past year."

Ben Blow of the National Automobile club was another individual who offered his aid to the project.

Bill Jerome, county auditor, and vice president of the Southern California Highway association, told of the days when he drove an eight-mile team over the proposed route to El Centro by the old Mormon trail and the Butterfield stage route, a trip requiring eight days.

George Kellogg, secretary of the association, described in detail his trip over the proposed route, going into El Centro by the Kane Springs route from Warner's Hot Springs. Loren Howe told of his trip going from Warner's down through the Mason valley, into El Centro through Vallejo. This is the route which the El Centro Chamber of Commerce is boosting.

Nat Neff, county highway superintendent; Ted Craig and Leo Hetzel, past president of the El Centro Chamber of Commerce, who was one of the delegation of four from that city, made short talks.

At the close of the meeting, which was attended by 150 people, 16 new members joined the association.

Ed Peterkin of Brea presided and F. V. Stahler, president of the Yorba Linda Chamber of Commerce, made the welcoming speech. Invitations have been received to hold the next meeting at Warner's Hot Springs and at Idyllwild.

## Talbert Boy Hurt In Machine Crash

Silas Youn, 14-year-old Talbert youth, was slightly injured yesterday when the automobile he was driving collided with a bread truck driven by Genaro Lopez, 43, at Orange avenue and Edinger street.

Both cars were badly wrecked. The youth refused medical attention and was given first aid by E. Hershey, city motorcycle officer, who answered a call to the scene of the crash.

C. E. Purdue, 44, of 2101 North Baker street, was today recovering at his home from injuries received Thursday when the car he was driving collided with a machine driven by D. M. Pettit, of 208 East Sixteenth street.

## Police News

Miss Vivian Dougherty, stenographer at 218 West Third street, reported to the Santa Ana police yesterday that her pocketbook, containing \$7.10 in cash, was stolen from her desk while she was out of the office for a short time.

An automobile owned by Jane Cuthbert, of Yorba Linda, was reported stolen from near the Fox Mission theater in Fullerton last night.

Taffy, the favorite confection of northern seaside resorts, traces its name to the South Sea Island of Java.

Melting of the Antarctic ice caps, according to scientists, would raise the levels of the oceans by more than 50 feet.

## Police To Issue Parking Tags In City Afternoons

Motorists who park their cars longer than one hour and two hours in the downtown district of the city on Saturday afternoon will be likely to get notice to appear in police court in violation of the overtime parking ordinance, following instructions issued to all police officers this morning.

Chief L. C. Rogers instructed him men today to consider Saturday afternoon the same as any other afternoon in the marking of cars and the new order will go into effect immediately.

Rogers explained that Charles Swanner, city attorney, had ruled that Saturday afternoon was not a holiday and therefore the ordinance could be enforced on Saturday afternoons.

## DISCRETION IN COUNTY OFFICE DECLARED NEED

LAGUNA BEACH, July 26.—Emphasizing the need of discretion, R. E. Haynes, of Fullerton, candidate for district attorney, gave a keenly attentive audience last night an analysis of the problems confronting that office. The meeting was held at the chamber of commerce, A. B. Marshall presiding.

Stating that his talk would be analytical, Mr. Haynes first took up the W. C. T. U. questionnaire submitted to candidates. He said that one of the questions asked for the stand on law enforcement, and that he had little doubt that all answered that they favored it. He thought this the normal American attitude.

But that the district attorney's chief business was the exercise of some discretion rather than the mere securing of convictions was the statement made by Mr. Haynes, one which met with the approval of his hearers, as he was later assured. The modern machinery of government made it comparatively easy to make arrests and secure convictions, he said, but this was not a thing to be especially proud of, he asserted.

"Not all guilty of offenses should be prosecuted," the candidate asserted. "This may seem an odd statement, but condition, environment, previous citizenship and many other things should be taken into consideration. In this state we are almost railroad men into prison.

"A district attorney should acquaint himself with the facts. First, is the man arrested probably guilty of having committed the offense; second, should he be prosecuted for that particular offense."

The candidate said that he had asked no one to vote for him, that he had been compelled to place his credentials before the public. Two letters were read by Mr. Marshall, chairman of the meeting, one from Ed L. Bryan, judge of the seventh judicial district of Idaho, and one from Senator William E. Borah, both attesting high consideration for Mr. Haynes and his work when a resident of Idaho. In recounting incidents of his work there, Mr. Haynes told of having prosecuted members of his own church, a millionaire business man, a candidate for governor and other notables in his work. He reiterated his interest in juvenile work and his fitness for the office through intensive study as well as having served for three terms as prosecuting attorney in Idaho.

# STATE REALTY HEADS CONFER IN SANTA ANA

With William Daum, president of the California Real Estate association; Glenn L. Willaman, secretary, Mrs. Aileen Vitz, assistant secretary, and other leaders in brokers circles of the state present, the board of directors of the state association convened at the chamber of commerce at 9:30 a. m. today, for consideration of business of the big state organization.

Approximately 75 representative men and women of the state were in attendance, as the session of the session of the board is one of the important meetings of the organization. The principal subject under discussion was that of creation by the state legislature, through the instrumentality of the real estate association, of a law providing for the development of funds for operation of the government by imposing taxes on other than real estate holdings.

The state association has taken a very definite stand in a movement to relieve property from some of the burden of taxation imposed for government operation, and it has been making satisfactory progress, according to local members of the association.

The directors continued in session at the chamber of commerce until noon, when they adjourned for

lunch at St. Ann's inn. They were scheduled to complete their discussions at the dinner table.

The meeting of the board was preceded by conference at the inn last night by three important groups—the conference on appraisals, the committee on uniform commissions throughout the state, and the advisory council.

Peter Hanson, one of the men outstanding in promotion of scientific appraisal of properties and chairman of the state committee on appraisals, presided at the appraisal conference. Discussions last night centered largely around the movement to create a law licensing appraisers those who can qualify under an examination that would be arranged.

Paul Bomberger, of Modesto, directed the conference on establishment of uniform fees. It is proposed, through the association, to establish the same commission fee in all sections of the state in order to obviate confusion resulting when brokers operating in different parts of the state under different fees co-operate in the negotiation of real estate transactions. It was pointed out at the conference that establishment of a uniform rate also would make available to land owners knowledge as to what they would have to pay in commissions in the case of a sale of property through a broker, no matter in what portion of the state the holdings might be located.

The advisory council took up matters pertaining to the best interests of the association.

Seven vice presidents of the United States have died in office. They were George Clinton, Elbridge Gerry, William R. King, Henry Wilson, Thomas Hendricks, Garret A. Hobart, and James B. Sherman.

WEEKLY SUNDAY SCHOOL LESSON

## Woman's Influence In World Affairs

The International Uniform Sunday School Lesson for July 27. Woman's Influence in Community and National Affairs. Judges 4:1-10.

By WM. E. GILROY, D. D.  
Editor of The Congregationalist

We are apt to think of woman's active participation in public affairs as of relatively late date, coming to its climax only during the last few years. Perhaps, however, few things are more remarkable in history than the way in which, despite the general relegation of women to a place inferior to man, women have, none the less, achieved conspicuous leadership and rendered profound service.

Here in a crisis in the affairs of Israel, in a time of unsettlement, when Israel was surely in need of leadership, it is interesting to find the chief leadership entrusted to a woman, Deborah, we note, was also a married woman. Whatever her personal or home obligations may have been, they had become enlarged by the strength and richness of her character, for she was not only a leader in the civil life—a judge of Israel, but she was a prophetess. It was her prophetic vision and messages that had no doubt given her her pre-eminence in the nation.

**The Source of Her Power**  
It is rather a stately picture that we have of her dwelling under the palm tree that had become associated with her name—a notable tree in the hill country of Ephraim, whither the children of Israel came to her for judgment.

The influence of good women has never been greater than when it has been exercised upon men, and Deborah's power seemed to lie largely in her capacity to inspire and guide others. She called Barak and gave him a military commission to go to Mount Tabor and take with him ten thousand men to fight Sisera, a captain of Jabin's army, who had nine hundred chariots of iron, and who for twenty years had "mightily oppressed the children of Israel."

Barak was not altogether ready for his task. He evidently feared the greatness of the power which Deborah was urging him to fight; but he had profound faith in Deborah, so much so that he declined to go without her; but he agreed to go if Deborah would accompany him. Deborah did not depend merely upon womanly influence, she was a woman of decisive action. She announced her readiness to go with Barak, though she also rebuked his lack of manfulness by reminding him that he should have no honor out of the encounter, as Sisera would fall through the hand of a woman.

The upshot of the whole matter need not be fully dwelt upon, Deborah's prediction fell true, and Sisera succumbed to assassination at the hand of Jael whose vigor and determination rather than her womanliness seemed manifest in the driving of a nail into Sisera's skull.

It must be remembered that the whole period was one of unsettlement when the life of Israel was in some measure disorganized, and there was a lack of that patient religious enthusiasm characteristic of the people in their highest experiences. It is against this background of a people lacking faith and courage and weak under oppression that Deborah's own faith and power of action stand out.

It was probably not the first time in history that woman's consecration to a great task had inspired new hope and action in those round about her, nor was it to be the last. One thinks of Deborah as a sort of matronly Joan of Arc, fired with zeal and spirit, conscious of a voice leading her forward and giving her strength. As Moses stands as the great type of liberator and lawgiver, so Deborah has captured the human imagination as the striking figure of womanly leadership and judgment.

**Many Womanly Virtues**  
It is a noteworthy point that her womanliness seems to stand out rather strongly in the narrative. We are not told a great deal concerning her, and we can fill in the picture only largely through our imagination, but there is nothing in the portrayal that suggests anything but womanly virtues deeply consecrated to the service of her people.

It is now over a hundred years since Mary Wollstonecraft wrote:

"Whatever virtue you possess, perseverance in it makes a double virtue."

Manliness reaches out to all mankind; it is kindness as well as courage.

## The Church Invites You

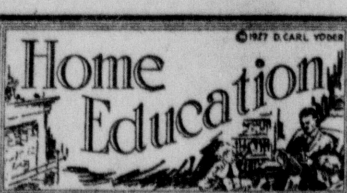

### TRANSMITTING RELIGION

Professor Norman Richardson says, "If Christianity as a living faith should fail to re-instate itself in the lives of the oncoming generations, it will die and be forgotten. Unless the Bible is taught, knowledge of it and love for it are relegated to oblivion."

"If electrical science should cease to be taught, that part of our civilization would drop out. It would become a lost art. In order to survive, Christianity must be learned by each succeeding generation."

The churches furnish a program of Bible study and provide public services of worship that Christianity may be understood and there may be imparted the right Christian motive. Why not accept the invitation and COME TO CHURCH NEXT SUNDAY?

D. CARL YODER.

**An Example In Service**  
Sir Harry Lauder was in Australia in 1914, and his son, just out of Cambridge University, was visiting him. One day, there was a cablegram for Lieutenant Lauder (who later was promoted to a captain) which read: "Mobilize. Return." The parting message of his father has been given by Sir Harry in the book, "A Minstrel In France."

"So we sailed away. And when I took John's hand and kissed him good-bye, I saw him for the last time in civilian clothes (he was killed later in France)."

"Well, son," I said, "you're going home to be a soldier, a fighting soldier. You will soon be commanding men. Remember that you can never ask a man to do something you would not dare to do yourself!"

"And, oh, the hawk look in the eyes of the bonnie laddie as he tilted his chin up to me!"

"I will remember, Dad!" he said.

Discussion questions on the Sunday school lesson: Deborah, a leader in a National Emergency, Judges 4:1-10, for Sunday, July 27.

1. How account for Deborah commanding a position of authority and power?

2. What changes in national and social progress may yet come because of the power of women?

3. What constitute the armies of wickedness in the United States and how may these armies be overthrown?

4. Why are the battles of peace not so enthusiastically supported as battles of war?

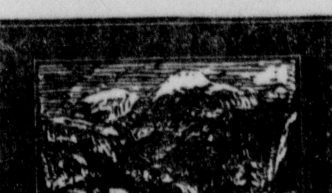

5. What lessons may we learn from Deborah?

6. What avenues of social service are opening to and inviting women?

Clericus says, "A sense of Jehovah's presence was the ground of the confidence of the Israelites. It kindled them into a glow of patriotism and armed them with power. However much confidence in God is manifest, nevertheless plans must be made on sound lines of good judgment."

Lesson prayer, "Forbid that we should be blind to organized forces of evil and succumb to them; give us a keen sense of the righteousness of God and stid us to fight valiantly the Lord's battles."

Cultivate your memory, for it is by memory that the mind is enlarged and life is lived fully.

The greatest teachers are those whose everyday life is an incentive to better and more useful living in others. One serene self-possessed person may influence a whole group to emulation merely by the force of his presence and personality.

True religion does not call for display. Its characteristic is its consideration for the rights and privileges of others and a fine appreciation of their feelings and natural inclinations. It is something that is felt rather than seen by others and the presence of one with deep religious convictions is always a good influence in any gathering. The spirit of true religion breathes gentleness and affability—it gives a native, unaffected ease to the behavior—it is social, kind and cheerful—far removed from the murky, self-righteous and ill-bred disposition that clouds the brow, sharpens the temper and defects the spirit.

So wherever we are—at work, at play or anywhere let us carry the true religious spirit with us—its influence is positive for good and let us remember that—"true religion will make any man a more thorough gentleman than can any royal court of this world."

**"Return of Jews"**  
Topic Of Sermon

COSTA MESA, July 26.—The Return of the Jews to Palestine—Russia's Part in the Last Days—will be the sermon topic Sunday morning at 10:50 a. m. of the Rev. D. W. Beverly, pastor of the Costa Mesa Four Square church, Newport boulevard at Rochester street.

Sunday night, "The Ups and Downs of Israel" will be the subject of the evangelistic service.

Week-night meetings are Tuesdays and Thursdays at 7:30 p. m. Attendance has been on the increase and plans are being made for new seats to be installed in the new future. The new room on the rear of the building is proving a great convenience.

Do not be too sure that your opinions are right; only make sure that your aims are right.

Hot heads never do cool thinking.

The quitter never wins and the winner never quits.

Men who want praise don't deserve it; men who deserve praise don't want it.

Courtesy is a virtue understood by all but practiced by few.

Before doing a wrong, you should remember that you are compelled to live with your memory.

Humility is not only a virtue in itself but a vessel to contain other virtues—Adams.

# NEWS FROM THE AUTOMOBILE WORLD

## SLOW THINKING HIGHWAY COP'S DRIVERS HELD JOB DANGEROUS ROAD MENACE REPORT SHOWS

The fastest thing you can do is to wink with your eye.

If a piece of candy or an insect is blown in your eye it takes about one-tenth of a second to wink.

Yet in that time, if you are at the wheel of an automobile moving 60 miles an hour, the car will continue 10 feet. A fast airplane will fly more than 25 feet, while a golf ball, driven from the wrong angle, can strike you 15 feet away before you are able to wink.

In other words, the margin between life and death is in a great many instances merely the wink of an eye, according to studies of the state division of motor vehicles.

Slow-thinking drivers are probably as great a menace on the highways today as the reckless driver. Modern life, with its speeding automobiles, railway trains, airplanes and machinery in factories and homes, is pressing close on the ability of mankind to react quickly and accurately.

Tests made on hundreds of thousands of persons have proved that the reaction time for the average person cannot be safely fixed at less than one second. This, therefore, sets the zone of safety which surrounds all kinds of moving machinery.

For example, the average automobile speed of 30 miles an hour requires a safe distance of 45 feet. At 60 miles an hour it is 90 feet. If your tire collapses or steering gear breaks at 60 miles an hour, you will be hurled 90 feet along the road before you have time to act.

With most manufacturers now advertising eight cylinder cars, speed on the highways is increasing. Nearly 70 per cent of accidents in California are due, it is estimated, to speed "too fast for existing conditions and the kind of driver."

It would be difficult to figure out how many thousands of lives, how many millions of money, slow-reacting drivers have cost themselves and others in the last 10 years, not because they are careless or incompetent, but because their thinking machinery can't work fast enough to keep up with modern mechanical methods.

The hazardous character of the California traffic officers' job was evidenced by a report made public by Eugene W. Biscailuz, superintendent of the California highway patrol, showing three officers killed and 69 injured in performance of their duties within the last 18 months.

Two of the fatalities occurred in the Kern county squad. Officers Howard C. Garlinger and L. W. Hogan dying in highway crashes. The third was Officer Leland Bond, of San Mateo county.

The 69 counted as injured include only those who were off duty long enough to draw compensation and does not include scores of sprained legs, battered hands, lacerated faces, etc., which traffic officers come to regard as a part of the daily grind of watching the roads.

Biscailuz said many of the injuries are of an extremely serious nature, one officer having been off duty for 18 months. Broken legs and arms, incurred in dashes after speed-maddened motorists, are of frequent occurrence.

The average number of men killed annually is three while the number killed or seriously hurt annually over a period of years has been close to 25 per cent of the entire personnel of the patrol, Biscailuz said.

Traffic officers find it difficult to secure life insurance except at exorbitant rates because of the extreme high hazard involved. Through an arrangement worked out with the state compensation insurance fund, however, injured officers received \$25 a week after the first week while off duty and the families of officers killed on duty receive a like amount until \$5000 has been paid.

In addition, the officers have protected themselves to a degree by benefit funds set up by their own associations.

In the hope of minimizing the death toll in the patrol, orders have been given that motorcycles be discarded for automobiles by men operating on night patrols or in wet weather.

## TREND TOWARD LOW -SWUNG CARS NOTED

A distinct trend toward the low swung automobile, pointed radiators, long wheelbase, long body lines and absence of top heaviness will mark the next period in automobile design development, according to B. E. Morthland, Auburn agent, here.

"The instantaneous success of the smart appearing Cord front drive has already made a decided impression on automobile designers," he said, "and indications are that the 1931 models will follow this trend even more so."

"It will be noted that the various mid-year models which have been announced have all incorporated these factors to which the public have given unusual acclaim."

## COMMITTEE HITS SPEED ON CORNERS

"Speed at blind corners makes many mourners."

This is the suggested slogan of the California Committee on Public Safety for August in its year-around program of concentrating each month on a specific fact of law violation. Excessive speed at intersections where the view is obstructed is responsible for many wrecks and fatalities, and by concentrating on this traffic violation during August the committee hopes to impress motorists sufficiently to reduce the casualty expectancy during the last month of summer, when motoring is at its peak.

## A PACKARD TODAY IS A PACKARD TOMORROW

Today's Packard Eights are finer and more luxurious than ever before. Though Packard constantly better, constantly refines, Packard improvements are evolutionary rather than revolutionary.

That is why Packard remains Packard . . . in appearance as well as in name . . . through long years of satisfactory service.

## STUDEBAKER INTRODUCES FREE WHEELING

Harry D. Riley had on exhibition here today models of the new series President and Commander eights with Studebaker's latest contribution to automobile history—free wheeling. Increased wheelbases, quieter operation, greater smoothness and improved body designs also mark the new series. Top, President eight brougham for five, with inch wheelbase and 122 horsepower motor; oval distinctive radiator of new product; center, Commander sedan for five; lower left, the dash board equipment; lower right, diagram showing that under free wheeling principle it is possible for wheels to be turning at 42 miles an hour while motor is idling at 8 miles an hour.

## ECONOMIES OF FREE WHEELING ARE OUTLINED

Free wheeling, the greatest advance in automobile engineering in 19 years, is announced by the Studebaker corporation in its new series President and Commander eights. In addition these new cars are provided with longer wheelbases, quieter operation, greater smoothness and new and improved body design.

"This announcement is of especial interest to motorists of Santa Ana in view of the championship performance of the past President eight and Commander eight models which have built up an enviable record of achievement attested by 5 world records, 18 international records and more American stock car records than all other makes of cars combined," said Harry D. Riley, Studebaker agent.

"Free wheeling involves a basic engineering principle which its engineers have developed and perfected over a long period of research and test work. Studebaker is the first American car to offer free wheeling.

"Free wheeling, as embodied in the new President and Commander eights, offers in addition to an entirely new and pleasurable driving sensation a host of engineering advantages not to be found in the conventional car, it is claimed.

"For example, car momentum never forces the engine with that sensation of piling up which is so common in conventional cars when deceleration takes place. At any speed, as soon as pressure is relieved on the accelerator, the engine immediately drops to idling speed while the car continues to glide forward as silently and smoothly as a bird on the wing. Throughout this process, the gears are constantly in mesh, leaving the driver in complete control of his car.

"Use of the free wheeling principle permits the motorist to do things with his car which at first experience seem incredible. He may shift gears from second to high and from high to second at any speed without touching the clutch. The clutch is necessary only to start and back up.

"Free wheeling results in an appreciable saving in gas and oil, because this new principle permits

the engine to drop to idling speed as soon as the foot is removed from the accelerator.

"Strangely enough, the great economies are effected in heavy traffic and hilly regions where the conventional car makes its greatest demands on gas and oil. Under such conditions free wheeling has resulted in a saving of 12 per cent in gasoline consumption, and 20 per cent in oil.

"Free wheeling eliminates the revisional strains thrown on tires, rear axle, universal joints, clutch and transmission of an ordinary car when the foot is lifted suddenly from the throttle. Carbon is also reduced because the engine is never forced by car momentum to pump excess oil and gasoline into the cylinders when decelerating."

## Wide Scope For Fire Prevention Work Is Revealed

More intensive and wide spread efforts than ever before are being employed throughout the state to prevent brush and forest fires during the present dry season. The extensive scope of this prevention work was brought to light at the last meeting of the state forest fire committee, a state-wide organization co-operating with the various county, state and national agencies.

One of the most important fire preventative measures has been taken by the state in insisting that spark arresters be installed on all tractors and other heavy machinery that is owned or leased by the state, whether used for building highways or forest trails and fire-breaks.

## ATTENTION! TO ALL MOTORISTS

The following statement was made by Karl L. Herman, of the Studebaker Corp. of America, after extensive experimentation

"The best development which we have noted in connection with the setting of caster, camber, toe-in has been by the Prather Manufacturing Company of Santa Cruz, California."

We beg to advise the motorists of Orange County one of these machines is installed in our shop and we have been using it for the past 3 years. Drive in and see it work.

NOTE—We have a cold axle setting machine which cost us \$450. We will sell this for only \$10.

Santa Ana Welding Co.

105 North Sycamore St. Phone 176

## SAWYER TELLS 44,869 AUTOS REASONS FOR REGISTERED IN POOR STEERING ORANGE COUNTY

Have you ever noticed when driving on a gravelled road that you sometimes hit that small, sharp stone which you endeavored to miss? Or that you drove directly through a deep chuckhole when you were sure that you were going to avoid it? Frank Sawyer, of the Sawyer Motor company, Humpville distributor, says he knows why you did it.

"Inaccurate steering and lack of steering control may be the indirect result of several things," he said. "But more often it may be directly attributed to one of two things—poor judgment of distance, or inefficient steering apparatus."

"The former condition might be attributable to a lack of driving experience or to defective vision. More often than not inaccurate driving control may be traced to a maladjustment of the various parts of the steering gear."

"There are many things that may reduce steering gear efficiency. The steering gear itself may have too much play. The steering control on any one of the steering knuckles or joints may be too loose to give the driver good road control. Likewise the toe-in or camber of the front wheels may be out of adjustment and, causing the machine to veer to one side. Such conditions may have been caused by a collision or jamming of the wheels against the curbing sidewalk so that the car perpetually runs a diagonal course.

"Positive steering control is essential to the safe operation of a motor vehicle. All of these points should be carefully checked at periodic intervals so that the driver may be certain his car will be always under control."

Orange county accounted for 44,869 of 1,330,095 automobiles registered up to June 30, 1930, according to mid-year registrations of motor vehicles released by Frank G. Snook, chief of the division of motor vehicles.

Registration of other vehicles from this county were, 169 solid-tired trucks; 2002 pneumatic-tired trucks, 194 motorcycles; 685 solid-tired trailers, and 993 pneumatic-tired trailers.

The total figures for the state for all classes is 1,968,012 and they represent a gain of six percent over the same period last year. Including vehicles that are exempt from fees—equipment of the state, county and city—the grand total of motor vehicles in the state is in excess of 2,000,000, according to the motor vehicle department.

The 58 counties of California and the state highway commission will divide a juicy "melon," when the \$6,000,000 in fees from the sale of license plates is apportioned.

Under the law, the counties and the highway commission will split the fees on a "50-50" basis for expenditure on the state highway system. The amount apportioned represents all collections after expenses of operating the motor vehicle division and the California highway patrol are deducted.

Los Angeles county, as usual, accounted for more than one-third of all registrations in California. Total registrations for the state showed: Passenger cars, 1,330,095; solid-tired trucks, 14,539; pneumatic-tired trucks, 73,833; motorcycles, 8,182; solid-tired trailers, 8,821, and pneumatic-tired trailers, 32,631.

The passenger car registration shows a gain of 90,000 over the first period of the previous year.

## FIGURES SHOW POPULARITY OF DE SOTO CARS

Although figures for the month of June, 1930, are not available, the total national registration reports for the first five months of 1930 show that the De Soto Motor corporation has moved into eleven place in the industry, according to J. E. Schultz, sales manager with the William E. Bush company, De Soto agent.

This figure compares with fifteenth place for the corresponding period in 1929, and fourteenth place at the close of last year, he said.

"Further evidence of the same rapid growth manifested by the organization since its formation in 1923 is seen in the addition of 674 new dealers during the first six months of 1930," Schultz said. "The first De Soto product, the De Soto six, was announced to the public August 4, 1928, and resulted in record-breaking sales for a first-year car, totaling 81,065 units for 1929."

Training in first aid given to members of the California highway patrol has already resulted in saving one life, it was announced here today.

Mrs. Helen Emrie, wife of a trainer at Agua Caliente stables, is alive because Officer Cliff Reed of the San Diego squad knew how to keep her from bleeding to death after her jugular vein had been severed in an automobile accident near Chula Vista.

One of the first to arrive on the scene, Officer Reed gathered the spouting vein between his fingers and pressed until he stopped the blood. He held the severed vein while Mrs. Emrie was lifted into an ambulance and a six-mile race was made to Paradise Valley sanitarium, when it was said she has an even chance for recovery.

First aid is a part of the regular course of instruction at the highway patrol school at Sacramento. Every officer attending the school is required to master it.

new dealers added in 1930, approximately the first 12 months. Of the 674 immediately 420 have joined the organization since May 12."

## NEW QUARTERS REQUIRED FOR GROWING FIRM

Dedication yesterday of the new store of Hockaday, Harlow and Phillips, distributor of automotive parts, at 201 Spurgeon, marked the third time the firm has changed its store location since it started its enterprise here in March, 1923.

Each move has found the organization in larger quarters. The last location was 108 South Main street.

The new building, constructed for the firm by William Rohrbacher, is an attractive structure, and is particularly adapted to the purposes of the distributors.

The concern opened its venture in a small room on North Main street in the group of buildings now including the Barker service station. As Harry Harlow expressed it, there was more or less doubt at the time as to whether a strictly automotive parts store could be operated successfully.

Within a year it was demonstrated that there was a place here for the enterprise, for the company moved to a larger room at 108 South Main and in succeeding years doubled and trebled the floor space.

The program offered by the firm last night incidentally to formal dedication of its new building was a success throughout. Eugene Biscailuz, superintendent of the California highway patrol, and one of the best known police officers in the Southland, had the honor of dedicating the new home. His address was appropriate and, full of interest.

While Robert Hockaday, Harry Harlow and Earle Phillips, owners and operators of the enterprise, have been meeting with big success in their Santa Ana store, they also have been extending their service to other communities by the opening of branch stores. They now have six, located at Santa Ana, Fullerton, Oceanside, Anaheim, Orange and Whittier. All of the men have had experience in the line they are following, and friends predict that in time they will have a chain of stores that will compete in point of number with some of the other large organizations.

Pointing out that "dependable service" is the slogan of the organization, Harlow said the big purpose is to supply automotive parts to dealers throughout the county in a quick service, relieving them of the necessity of going to Los Angeles for equipment and waiting the time it is necessary to get delivery.

Harlow said that A. Arthur Whitney would have quarters in the new building for his machine shop, where motor reconditioning, machine work and speedometer service will be available.

## That Crumpled Fender

We Make It New!

Careless drivers and fog . . . is it any wonder that summer takes tremendous toll in smashed fenders, bumpers and auto bodies? But no need to worry when nicks and dents appear—here you find a fender and body service that straightens and polishes damaged outer parts perfectly. Keep your car looking new and smart at all times this way. We are an authorized du Pont Duco Refinishing Station.

## CARS POPULAR WITH CITIZENS OF LITTLE CITY

South of Patagonia in South America lies the furthest south of all South American cities, Punta Arenas, an isolated community belonging to Chile. Punta Arenas is a free market and places no duty on imports or exports of any kind. Trade naturally flourishes. As a source of income, wool leads in importance with whale fishing second.

"Automobiles are very popular in this furthest south community," says Clifford Greenleaf, Graham dealer. "In Punta Arenas, motor cars are only used about four months out of the year because of heavy snows during the winter season, yet they play an important part in the life of this little community and have contributed much to its growth and development."

"The Chilean government employs odd looking cylindrical bulletin posts as a place for displaying decrees and public notices. They are scattered throughout the city and are usually well covered with various official messages and notices of interest to the people."

"General Banles, present dictator of Chile, has brought an era of prosperity to his country that is unmatched elsewhere in South America. More automobile roads are under construction in Chile than in all the rest of the country combined. Streets are being widened and paved, and a complete through highway is being built from Valparaiso, the chief port of call to Santiago."

## Automobile Grade Crossing Accidents Drop In Past Year

A reduction of three and one-half percent was attained in automobile grade crossing fatalities during 1929, according to recent figures of the interstate commerce commission.

In 1929 the total auto grade crossing accident deaths was 2,085 as compared with a total of 2,165 throughout the entire country in 1928. Last year the first time since 1920 that a decrease was recorded in grade crossing fatalities, according to the tabulation.

## OFFICER LENDS MOTORIST \$20. GETS IT BACK

Taking a chance of arresting erring motorists is one thing for officers in the California highway patrol but taking a chance at lending money to strange but stranded motorists is another.

Inspector M. F. Brown, in charge of the Eureka district for the patrol, does both on occasion, however, and gets away with it.

Recently Brown encountered a Sacramento river delta farmer in an out-of-way place in Northern California with his car broke down and without funds.

Brown was on his way to the patrol school at Sacramento and wasn't too well blessed with funds himself but he managed to "dig up" \$20 and sent the stranger on his way with his blessing.

The following day Brown received his \$20 by mail with a note of thanks from the farmer.

"All in the day's work," commented Inspector Brown as he pocketed the money.

## Preparations For Oiling Mountain Highway Started

Preparations are now under way to oil the High Gear road from Hemet to Idyllwild, located in the San Jacinto mountains, Riverside county, according to the touring department of the National Automobile club. The present route is through a scenic mountainous country, and the road is in good condition and wide enough for two cars all the way. However, oiling of this road will eliminate the dust menace and will greatly improve this route during the wet weather. It is expected that this work will be completed by October 1, 1930.

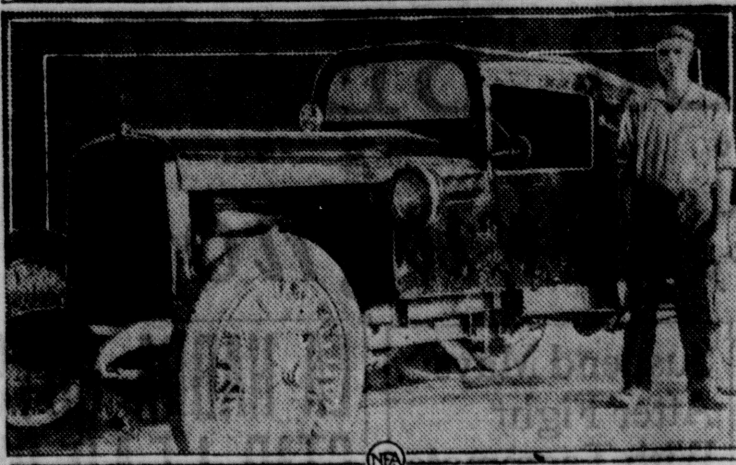

## VEHICLE ACCIDENT DEATHS SHOW DROP

In 48 cities in the United States motor vehicle accident deaths were fewer in 1929 than the preceding year, according to figures from the National Safety council reaching the Automobile Club of Southern California.

The cities with more than 500,000 population that made this record were, Boston, Chicago, Milwaukee, San Francisco and Washington, D. C.

## BUILDS GAS-ELECTRIC CAR

Albert Melentine, 20-year-old mechanic of Madison, Wis., has built a gas-electric automobile, after two years of work, which he says goes from 30 to 40 miles on a gallon of gasoline. Power is obtained from a generator underneath the car driven by a gasoline engine, that of an ordinary auto. The car needs no gearshift, as both power and speed are controlled by the throttle. Melentine and his car are shown here.

## OLD CADILLACS BEING USED AS CHINA BUSES

From Mukden, Manchuria, comes a story of the remarkable service which a group of Cadillac V-eights, all of them built more than ten years ago, are rendering as buses between Hailar and Urga in the northern part of China, according to Otto Haan, Cadillac dealer. The epic of these ancient motor cars was forwarded recently to the Cadillac factory by Ph. D. Panchetta, of General Motors China, Inc.

"There are quite a few old Cadillacs here in Mongolia," wrote Panchetta. "Between 35 and 40 of these, some of them built in 1916, operate between Hailar and Urga as buses. It is a wonder how any car can stand up under the terrible operating conditions. Often proper lubricating oil is unobtainable and Manchurian bean oil is used instead. On this run they are loaded 32 passengers (usually tied together with a rope) on a seven-passenger car and they run not for 20 miles but for trips of about 1000 miles—from one end of the line to the other."

The Dodge Brothers eight "mileage marathon" sedan, which left the factory July 1 on a journey which is expected to continue for many months and pile up more miles than any automobile has ever before been driven, completed its first trans-continental round trip with a rousing welcome by officials of Dodge Brothers corporation at Detroit, according to L. D. Coffing, dealer.

When Lou Miller, cross-country driver, stepped from the car after having completed the first lap and driven 3236 miles he said "as he officially turned it over to the two crews of experienced experimental drivers, who will continue with the run: 'Boys, it's a wonderful car, and the fourteen days passed entirely too soon.'"

Ray Priest, official observer of the A. A. A. under whose sanction the marathon is being staged, will continue with the car.

The two crews of two men each are to make Kansas City their headquarters and will change at this point on future trips. Each crew will drive seven days and rest seven in the long months of driving to follow.

State Peach Mark Near 1926 Record

FRESNO, Calif., July 26.—(INS)

—With prospects of dried peach tonnage reaching the record crops of 1926 and '27 which approximated 28,000 tons, the California Packing corporation's opening prices to trade for the 1930 season were the lowest since 1923, the quoted price was approximately 6 cents per pound to the growers.

A narrow price range, as compared to previous years, is being offered. Yellows unpeeled were quoted at 7-14 standard to 9-3-4 for extra fancy, with Muirs unpeeled, 7-1-4 standard to 10-1-2 extra fancy.

Prices for 1929 offered a much higher range with Muir and Yellow standards at 12-1-4, to Yellow extra fancy at 15 and Muir extra fancy at 15-1-3.

Two German passenger liners have been equipped with bowling alleys in which machinery automatically resets the pins, returns the balls, and indicates the scores.

While detailed figures were not completely available today so far in July there has been no lessening of the high rate set during June."

Following the breaking of all June records in both the delivery of new cars to customers and shipments from the Packard factories, the rate of delivery and shipments of Packard cars is kept up to the same high levels thus far in July, according to Elvin E. Webb, Packard agent here.

Packard deliveries and shipments in June exceed those for any other June in the 31 years of the company's history," he said. "Deliveries totaled 4300, which exceeded the best previous June by 150 cars."

### Cochet, Brugnon Win Doubles

### U. S. DAVIS CUP HOPES FADE IN 4-SET DEFEAT

PARIS, July 26.—Henri Cochet and Jacques Brugnon of France won over Wilmer Allison of Austin, Tex., and John Van Ryn of East Orange, N. J., in the doubles match of the Davis cup final today to give France a lead in the challenge round play of two matches to one.

The score was 6-3, 7-5, 1-6, 6-2. Cochet, a last minute choice for the doubles play, was in excellent form, while Allison, regarded by many as the leading doubles player of the four, slumped badly in the first two sets, Brugnon played unusually well which enabled the French side to gain its early lead.

The French used some strategy when they took a rest after trailing by five games to one in the third set. They deliberately threw away the seventh game.

Interlude Improves Play

The interlude improved their play, for they came back to win the first five games of the fourth and deciding set.

Cochet and Brugnon played unbeatable tennis in this set. Observers said their work in the deciding games was the best doubles performance of their careers.

The Americans, however, figuratively fell to pieces. Allison appeared to be trying valiantly but was unable to shake himself from his lethargic style which had marked the earlier sets. He made many errors in the fourth set.

The French victory in the one doubles match left the Americans with the tremendous task of winning two single matches Sunday. In these singles, Bill Tilden will play Cochet, while George Lott meets Jean Borotra.

U. S. Hopes Dark Now

Each side has one single victory, Tilden defeating Borotra while Cochet beat Lott.

Today's doubles setback made dark indeed the U. S. hopes of regaining the historic Davis cup which was won from the Americans by the French in 1927, and since retained on this side of the Atlantic.

The current final is the fourth consecutive one in which the United States has challenged France for possession. The U. S. regained the cup from Australia in 1920, and kept it safe from attacks by Japan, Australia and France until the French triumph of 1927.

Observers today believed it quite possible that the only U. S. victory in the 1930 play already has been won. Cochet played so well today that his chances for beating Tilden are bright, this despite the fact he will have played on three consecutive days. He was not unduly extended in winning over Lott Friday, nor did today's contest force him to overexertion.

Borotra, also, is favored to beat Lott.

### Suspend Mays After Fight With Teammate

PORTLAND, Ore., July 26.—Carl Mays of the Portland Beavers was suspended indefinitely today by President Thomas L. Turner who said that it would stand until the veteran underhand pitcher is in condition to take his turn on the mound.

Mays' suspension follows a fight which he had with Johnny ("Junk") Walters prior to Wednesday night's game. Mays was said to have suffered a broken rib and a broken nose. Walters also is suffering from bruises and his pitching arm is black and blue. He has been at the park every night, however, since the fight.

The rough-and-tumble melee between the two pitchers climaxed several arguments that started in spring training camp at San Jose, Calif.

### ACE OF COURTS

Henri Cochet, French wonder man of the tennis courts, exhibited all of his wizardry today in helping his countryman, Brugnon, defeat John Van Ryn and Wilmer Allison of the United States in a Davis cup doubles match in Paris. Cochet meets Bill Tilden in singles tomorrow.

PIPING 'EM OFF

### EX-SANTA ANA ANAHEIM HERO: RACE HOT NOW

When Orville Schuchardt gets to be an old man he will have something to tell his grandchildren. He will have much to say, in fact.

He can tell them about the facts and figures that have made him the most discussed young man in Santa Ana and, if he chooses, he can tell them how on the night of Friday, July 25, 1930, he hit a home run in the eighth inning—a home run that gave Anaheim, the town of his transplanted affections, a 5 to 4 victory over Santa Ana, the team still perhaps of his first love.

There was a lot of irony in that home run—a hard hit line drive to right field which meant so much to so many different people.

There was stark drama in it, too, for with it Schuchardt, the man who went to Anaheim for a job and a \$50 money order, silenced the theater of fans which booed him every time he came to bat against his former teammates.

Uphill Fight of No Avail

Might makes right, and Schuchardt made them all like it.

His home run really broke up the ball game. When he zoomed that ball just out of Outfielder Johnny Lutz's reach he broke a 4-4 tie for which the Stars had fought uphill—desperately and valiantly.

Schuchardt came up after Bill and Al Bushman had gone out meekly enough.

There did not seem to be any reason for Santa Ana to be unduly alarmed.

Cornelius then sneaked a fast one by Orv, and made it two strikes on a foul tip. Then he wasted one so it was 2 to 1 when Schuchardt connected.

The ball was well caressed—Orv Schuchardt edged. Lutz was playing a bit shallow in right field and although he made a desperate run for it the ball went straight through his outlying arms, and on and on into the overflow crowd at the edge of the park.

Schuchardt had time to circle the bases twice.

PIPING 'EM OFF

### SHOOTING SHUTE

by Denny Shute

One of the things that worries a golfer who isn't hitting his shots as well as he could wish is his stance. The poorer his shots go the more uncertain he becomes about how and where to place his feet.

Really this is a simple matter, although I know it isn't to a good many players.

There are two standard stances used by the majority of players, but there is really no ironclad rule about how to stand except, of course, to take a position that makes you perfectly at ease as you address the ball. This allows for perfect balance through the backswing and does not hamper the stroke on the downswing or the follow through.

The stance, in other words, is simply placing the feet in the easiest position to carry through the pivot necessary in making a perfect shot. It is a matter of individual build and utility.

Most players' stances fall into one of two classifications, the closed stance, as used by Tommy Armour, for instance, and the slightly open stance, used by such players as Bobby Jones, Walter Hagen and Gene Sarazen.

The closed stance merely has the left foot up even with the right foot across the toes in hitting the ball. In the open stance the left foot is slightly behind the right.

Don't worry about the distance between your feet. Whatever way you stand, as long as you can make your pivot without hindrance, without feeling that you ought to move one of your feet during the course of the swing, is all right. If that doesn't answer, get your feet a bit closer together.

### LEHMAN LEADS COUCH 3-UP IN TITLE TOURNEY

BEVERLY COUNTRY CLUB, Chicago, July 26.—Johnny Lehman led Ira Couch three-up at the end of the first 18 holes of their 36-hole all-Chicago final battle for the Western amateur golf championship over the Beverly Country club course today.

Lehman shot a medal score of 37, one over par, to gain a two up margin at the end of the first nine holes, and strengthened his lead coming back to the clubhouse by shooting a 38, three over perfect figures. Couch was out in 39 and home in 41.

A feature of the round was that only three holes, the sixth, twelfth and eighteenth, were halved.

Lehman has played consistent golf throughout the tournament. He was co-medalist with "Chick" Evans, Chicago, with a score of 147 for the two qualifying rounds. To achieve that score he put together a 72 and 74 and he has played low 70 golf throughout the tournament.

His most grueling match was with Don Moe, the defending champion, whom he eliminated on the 37th hole in a quarter-finals battle.

### LEMON KNOCKED OUT BY MILLER IN 6TH

Benny Miller, 150-pound Los Angeles pugilist, accounted for his third successive victory when he won by a technical knockout from Romeo Lemon, Fullerton welterweight, in the sixth round of a main event at Hollywood last night.

Lemon showed gameness but was no match for Miller's clever style. The Angeleno lost the first round, but thereafter gave Lemon a bad beating and in the sixth round scored a knockdown. Lemon arose at the count of seven but Referee Harry Lee decided the fight was over.

Jimmy Alvarado decisioned "Red" Humphries in a slow semi-windup, and Young Papke was awarded a technical knockout over Frankie Abendino in the third round of the special.

### TO BUY WATER WORKS

SAN JUAN CAPISTRANO, July 26.—The railroad commission of California has authorized the purchase by the Orange County Water works, district No. 4, of the water works system owned by Esteban Oyharzabal jr. This utility serves water to the inhabitants of the town of San Juan Capistrano.

### Macias Knocks Out Codan In Ventura

"Wild Man" Macias, Los Altos Mexican heavyweight, knocked out Matt Codan in the second round of a main event in Ventura last night. This was one of the most impressive victories of Macias' career. Macias meets Paul De Harte at the Orange County Athletic club a week from Thursday.

### Jackson Kayoes Wills In Eighth

SAN DIEGO, July 26.—Sammy Jackson, Los Angeles welterweight, scored an eighth round knockout over the veteran Young Harry Wills here last night, after dealing the San Diego fighter a severe beating that resulted in his collapse at the hands of Lew Tendler.

### FAMILIAR GROUP

The Navy crew that was swamped in the wake of a destroyer in the annual Poughkeepsie regatta late in June was composed almost entirely of men who had rowed together for four seasons at Annapolis.

### MERCHANTS TO PLAY TUSTIN TOMORROW

After a lawoff of several weeks, the Santa Ana Merchants baseball team will swing into action against the newly organized Tustin ball club at the Tustin high school field tomorrow at 2:15 p. m.

The Merchants have recruited a formidable array of talent including "Swede" Whistler in center field, Clementes on third base, Jiles catching and "Fuzz" Page, Al Tovery and Ernest Shaw, pitchers.

Santa Ana also has some new players, including Wilson, former San Diego high school star and left fielder for the champion Encinitas team; John Willcutt, former Saint pitcher and recently of the Waterloo, Iowa, team in the Three I league, and Sisk, third baseman from the Los Angeles Pacific Electric team.

The Santa Ana lineup will be Schuchardt, cf; Foster or L. Scott, 2b; Bell, rf; Heard, 1b; Sisk, 3b; Wilson, lf; R. Sullivan, ss; Koral, c; and Drysdale and Willcutt pitchers. Warren Sullivan and Al Muckenthaler will be unable to play because of work.

### BELL, CRESS CLASH IN TENNIS TOURNEY

Santa Ana tennis supremacy will be decided on the high school courts tomorrow when Randolph Bell and Johnny Cress, ranking players of the City Playground tournament, clash at 2:30 p. m.

Neither Bell nor Cress has suffered defeat in the round-robin series now nearing completion under the supervision of Merle Ewell, assistant to Playground Director L. W. Archer. In fact, neither star has so much as lost a set.

The Bell-Cress final is considered a toss-up.

### ANAPAUMAS TO PLAY L. A. COLORED TEAM

D. Eymann Huff's Anapauma Rancho baseball team will meet the Los Angeles Colored Giants, one of the outstanding semi-pro nines of the Southland, at the Orange County Fair grounds tomorrow at 2:15 p. m.

The Anapaumas had their long winning streak broken by Encinitas last Sunday but believe they will regain their earlier form against the Negro aggregation.

Al Encinas, Huff's ace moundman, will be on the ridge. Tony Rego will do the receiving.

### HUNTINGTON BEACH BEATS ORANGE, 5 TO 3

Howard Morning shaded Kenny Walker at Orange and Huntington Beach defeated the National Night league tallenders, 5 to 3. The score:

R. H. E.  
Hunt. Beach... 000 301 010—5  
Orange... 000 010 000—3

Batteries: Huntington Beach—Morning and Baher; Orange—Walker and Thierly.

### GARDEN GROVE FORFEITS TO OLIVE PACKERS

Garden Grove could muster only seven players and forfeited to the Olive Packers, 9-0, a game that was to have been played on the Olive diamond.

### Atwood Nine Will Meet Arrowhead

ATWOOD, July 26.—A baseball game is scheduled to be played at the Atwood field Sunday between the Atwood Merchants and the Arrowhead Oil company's team. Paul Lugo is manager of the Atwood Merchants.

### GOLF COURSE RANKING

New York state is first, Illinois second and California is third in the total number of 18-hole golf courses.

### Santa Ana fans gave Schuchardt a terrific razzing every time he came to bat but the former local star made them like it before he was through. Just as some rabid bug shouted "Benedict Arnold" at him, Schuchardt smote that home run.

The game was devoid of the fielding features which usually abound in Santa Ana-Anaheim spats. "Memphis" Hill's catch of Murry's four in the sixth and Rockwell's long run to snare Daley's foul and the game were the only spectacular plays.

Local night ball followers only have to go on the road with their team to appreciate what a good thing they have in the Bowl. Anaheim folk are quite proud of their park but it compares in no way with the enclosure here.

### Bunts Rout Cornelius

A well directed bunting attack and Cornelius' wildness gave the

## TWO BLACK CROWS HERE IN NEWEST SHOW

## "Midnight Mystery" With Betty Compson, Here

THRILLER IS TO  
PLAY AT WEST  
COAST MONDAY

Something new in the way of a mystery melodrama arrives on the talking screen of the Fox West Coast theater Monday with the presentation of "Midnight Mystery," the new Radio Pictures production featuring Betty Compson and Lowell Sherman. Here is a thriller with a punch of novelty that makes it doubly interesting. Splendid playing by a star cast, smooth direction and a story that builds to stirring climaxes make "Midnight Mystery" an evening's genuine entertainment.

The story has been adapted from the stage success, "Hawk Island," and is concerned with an oddly-assorted set of guests at a house party in a castle on a storm-beaten island off the Maine coast. Every bit of action in the film is encompassed within less than a twelve-hour period, with the major part of the story running through a night of electrifying adventure.

Based on the "murder" of a "dummy" which later proves to be more tragically real than the joker supposed, the picture offers the audience in on the secret before the characters themselves suspect what has transpired. Even so, the element of mystery is maintained to the end.

George B. Seitz, veteran director of many mystery successes, scores his finest work with "Midnight Mystery." His direction is given capable support by the cast which includes Miss Compson, Mr. Sherman, Hugh Trevor, June Clyde, Rita La Roy, Marcelle Corday, Ivan Lebedeff, Raymond Hatton, William Burt and Sidney D'Albrook.

## DANCE STAR CAST

Tom Patricola, one of Broadway's dancing favorites, has been added to the supporting cast of "The Better Wife." Ruth Chatterton's and Clive Brook's Paramount co-starring picture.

## BETTY COMPSON

Famous R. K. O. star, who comes here Monday in "Midnight Mystery" which will be shown at the Fox West Coast theater.

Bill Haines  
Here In 1st  
Cowboy Role

William Haines, whose style of acting is different from that of any other actor on the screen, and which has won for him admirers by the thousands, is appearing at the Fox Broadway theater Saturday and Sunday in his latest all-talking picture, "Way Out West." The picture is the first that Haines has ever appeared in as a cowboy, but being an expert horseman, this was one of the things he did not have to learn in order to make the picture.

The film was made on government property amid hundreds of Hopi Indians.

"Way Out West" is the story of a circus performer who "gets in bad" with a number of cowboys whom he defrauds with a roulette wheel. They start to hang him and decide it will be better to take him back to their ranch and put him to work until he can pay back the money he stole from them.

From that time until the end of the picture, Haines is a cowboy. A Fox Movietone news reel and an all-talking comedy also are shown.

ACTRESS KEEPS  
SCRAP BOOK OF  
ANOTHER STAR

By DAN THOMAS  
NEA Service Writer

HOLLYWOOD, Calif., July 26.—Keeping publicity scrap books is not a new occupation around the movie village. In fact, most of our film folk do it to such an extent that it might almost be termed a business. However, Lupe Velez is the first one we have run across who keeps a scrap book on another star's publicity.

Lupe does everything but worship Greta Garbo. It's genuine admiration, too, as is proved by the scrap book she is keeping on the Swedish actress. Every picture or story about Greta that Lupe finds in newspapers or magazines goes into this book. And the strange thing about it is that they know each other only slightly.

The above paragraph sounds as though it might have been conceived by the press agent for either Lupe or Greta, but it isn't. It happened to be out at Lupe's the other night and saw the scrap book—and Gary Cooper. Naturally Gary would be there. The romance between those two is just as hot as ever. And Lupe told me that 10 years from now she expects to be washing dishes, so you can draw your own conclusions as to its outcome.

Practice Value  
Is Appreciated  
By Gary Cooper

Gary Cooper, Paramount star, showed the value of talking picture rehearsals recently when he made the same mistake three times in practice.

Cooper, a young engineer in his latest film, was supposed to tell June Collier he was making \$350 per month—an ample amount for matrimony.

"I make \$350 per week," Gary repeated three times. Rowland V. Lee, director, finally impressed upon Cooper that \$350 a month was a big salary for a young engineer.

## VIRGINIA ROBERTS

One of the most popular girls in the big Santa Ana Register-Fox West Coast theater popularity contest.

Ken Maynard Film  
Ends Run Tonight

"Song of the Caballero," all talking western starring Ken Maynard is closing tonight at Walker's State theater.

It is packed with action, break-neck horsemanship, stunts, romance and thrills.

The story moves along at a lively clip and has been photographed in an extremely colorful setting.

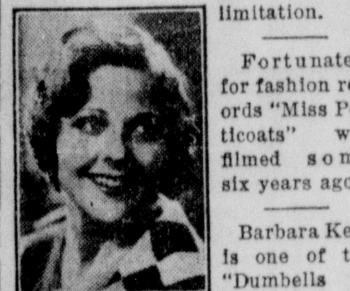

It is a near-perfect western and will be thoroughly enjoyed by both young and old.

Tuning in on  
the Talkies  
by Walthill

THE "little theatre" movement has spread to the screen. Vitaphone Varieties list scores of "little shows."

"Well," said Al Jolson as he paid for his wife's new handbag, "there's one snake that didn't frighten you."

Film title asks: "Can a Woman Love Twice?" but does not explain how come the limitation.

Barbara Kent is one of the "Dumbbells in Ermine" but she doesn't look the part.

As an experiment in talkie science "Captain Blood" will be transposed to the screen by First National.

Rin Tin Tin is one actor who has thus far escaped the divorce court. Actions speak louder than words, except in the talkies.

Told in Two Lines "Our Blushing Brides" "Slightly Scarlet."

Fence-Rail Talkies Farmer Silo says: "Diversified crops are all right. We raise crickets, frogs and crows so we don't need any radios."

Tinkering With Film Titles "Forever After" is only a short while in the movies. "Mind the Paint Girl" is a warning that goes unheeded. "Mother's Cry" and "The Father's Curse" as usual in movies.

The Sky's the Limit "Murder in the Cellar," "Murder on the Second Floor" and "Murder on the Roof" is movie proof that crime stock is going up.

"The Woman With Three Faces" must have had two of them put on with paint.

FIVE BIG ACTS  
VODVIL APPEAR  
AT WEST COAST

Five snappy acts of high class vaudeville, besides a stage band and the return to Santa Ana of Cookie Bowers, well liked master of ceremonies, feature this week's Fanchon and Marco Varieties, which comes to the Fox West Coast theater Saturday and Sunday.

The vaudeville, which in the language of the fans is "getting better and better" each week, is this week said to be the best that has been seen in Santa Ana in the past several years.

That the best is procured for his patrons here is the purpose of Norman Sprowl, Fox theaters manager, who said that he could highly recommend this week's bill over anything that has been here during the past several weeks since the return of the Fanchon and Marco shows.

Daum and Scott, a hand to hand comedy acrobat act head the bill; Lucille Iverson, in dances; Nat Spector, comedian singer, Gus Elmore and Company, in a black face and dance act; John and Harriett Griffith in a dance novelty and Cookie Bowers in his "Imitations" comprise the bill.

On the screen is seen "One Hysterical Night," starring Reginald Denny.

"BRIDE OF THE  
REGIMENT" AT  
STATE THEATER

A beautiful woman who must fight for her home against a hostile soldier on her own wedding night provides an interesting situation in "Bride of the Regiment," First National's all-technicolor operetta coming Sunday to Walker's State theater.

Her husband captured by Austrian forces, the countess must submit to the handsome Austrian leader or witness the death of her husband. The story is laid in Italy during the Austro-Italian war of 1830. It is based on the German novel and the New York musical hit, "The Lady in Ermine." Vivienne Segal and Allan Prior, stage stars, sing the leading roles of Countess and Count Beltrami. Walter Pidgeon is the Austrian colonel, Louise Fazenda, Ford Sterling, Myrna Loy, Lupino Lane and Harry Cording are prominent in the large cast.

"Bride of the Regiment" contains music of the original operetta supplemented by songs written by studio composers. John Francis Dillon directed.

EX-STAGE STARS UNITED Four former stars of the New York musical stage are featured in Paramount's song extravaganza, "Let's Go Native." They are Jeanette MacDonald, Jack Oakie, James Hall and Skeets Gallagher.

## BLACK CROWS AT BROADWAY

Moran and Mack, in the Paramount film, "Anybody's War," which comes to the Fox Broadway theater Monday for four days. The picture is said to be overcrowded with comedy.

DENNY AT WEST  
COAST IN LATE  
FARCE COMEDY

"One Hysterical Night" starring Reginald Denny in his latest all-talking comedy, comes to the Fox West Coast theater Saturday and Sunday.

"One Hysterical Night" emerges from the outpouring of talking pictures as the comedy film that is different, one that is built around an entirely new situation and one in which the dialogue and plot twists naturally produce howls of laughter.

It's a perfect Universal-Denny picture in as much as Denny wrote the story and the dialogue with James Craft, director of several of his recent successes, directing Nora Lane, refreshingly charming, plays opposite Denny.

In the picture Denny finds himself as "Napoleon," at a fancy dress ball, where those present believe that he is cuckoo and really thinks he is "Napoleon." The merry-makers band against him and precipitate a series of dramatic and humorous situations. It is there that he meets his "Josephine," Nora Lane, who also believes that he is deranged. How he establishes his sanity make a spirited and entertaining story. With Denny and Miss Lane in the cast are E. J. Ratcliffe, Fritz Feld, Slim Summerville, Jules Cowls, Joyzelle, Walter Brennan, Henry Otto, Margaret Campbell, Peter Gawthorne, D. R. O. Hatawell, Rolfe Sedan and Lloyd Whitlock.

ERWIN ASSIGNED ROLE Stuart Edwin, the dumb Axel in "Sweetie," has been added to the cast of Maurice Chevalier's next starring picture, "The Little Cafe," which enters production at once at the Paramount studios under the direction of Ludwig Berger.

MORAN. MACK  
ARE SOLDIERS  
IN WAR COMEDY

Moran and Mack, the two Black Crows, arrived at the Fox theater Monday for four days and dig themselves into the ribs of its patrons in a sure-fire laugh production called "Anybody's War."

Based on the novel, published several years ago, "The Two Black Crows in the A. E. F." by Charles E. Mack, leader of the team, "Anybody's War" is so richly endowed with exuberantly comical material that its makers could have made two full length pictures out of it. Had they a mind to. They have packed "Anybody's War" so full of mirth that it seems to overflow, from start to finish, in lavish outpourings of jocosity.

The story, as you would suspect, deals with the adventures of the two dusky comedians in the trenches of France. It opens with scenes in the quaint little town of Buford, Tennessee, where Mack is the official Dog Catcher, an office-holder who is so kind-hearted that he never kills the dogs he has captured. Instead he takes them to his little shack and boards them there, hiding them in the cellar whenever a higher official from the town pays him a visit. Moran is seen as his side-kick who gets soldier-ferver and joins the recruits for the big scrap overseas.

Mack tries to enlist but is thrown out because of his feet. Picking up Deep Stuff, his favorite canine captive, he sneaks aboard the transport with the soldiers. Officials give him another examination, from the ankles up, and he is permitted to join the khaki ranks.

Meanwhile Joan Peers, daughter of an aristocratic Southern family of Buford, and Neil Hamilton, her telegrapher boy friend, manage to get overseas as a "Y" entertainer and a lieutenant respectively. The fortunes of their love forms the romantic thread that holds the comedy capers of Moran and Mack together in a loosely woven plot fabric. Of course the lovers are happily united at the finish after their exciting adventures.

# FARM NEWS FROM EVERYWHERE

## Crill Tells Of Western Farm Meet In Radio Talk

### ORANGE COUNTY REPRESENTED AT SALT LAKE

BY J. W. CRILL  
Vice President, Orange County Farm Bureau  
(Editor's Note—This is the text of a talk given over radio KREG Monday night.)

Good evening, Farm Bureau and other friends! In the time allotted me I shall attempt a very much abbreviated and meager account of the Western States conference which took place at Salt Lake City, July 8, 9, 10 and 11, under the auspices of the American Farm Bureau federation.

There were 40 some addresses, papers and articles presented at this conference, to say nothing of conference lunches, dinners, breakfasts, impromptu meetings, etc. I trust you are beginning to appreciate the utter fullness and hopelessness of my task. These Farm Bureau conferences present a true demonstration of the farming fraternity's ability to absorb work. There were approximately 300 in attendance from the 11 western states.

A splendid group of eager, earnest, serious minded, attentive listeners, wholly absorbed with the business of the day. There was very little of the fanciful or inspirational; just cold analytical facts and figures; right down to earth stuff, very typical of these meetings.

**Legislative Programs**

Some of the main topics of interest discussed were legislative programs, farm to market roads, commercial services to members, tax program, the president's public land commission, legislation governing the use and control of underground water, the trend of legislation respecting federal financing of irrigation projects and the farmers' interest in the national forest and the public domain.

The tax program with its many ramifications created a great deal of interest. Roland Flaherty presented a paper on "The Relationship of the Tax Program to Membership," which aroused considerable discussion and interest. It was the unanimous opinion of the group that the taxation question was a major problem and should receive first consideration in each state's program of activities.

**Need Tax Experts**

In attacking this problem, it was admitted to be a well established fact that industry and the utilities had long since recognized the importance and necessity of having trained tax experts to represent them in legislative bodies, commissions, etc., and if the Farm Bureau hopes to successfully cope with this situation, they too must have a tax expert; but with the broadened view, and to base their findings upon unbiased and capable research rather than on individual opinion or seemingly expedient or popular remedies. The tax program as it is on the hills and on the whole, the methods employed and the structure set up to handle it are fully as antiquated. The California Farm Bureau federation has a tax research department most capably manned, that is dissecting this tax thing from "a" to "z" and it will be no great surprise to me if one of the greatest tax reforms of the age does not spring from this very source.

**Water Important**

The water equally as important as the tax problem, if not more so; in fact, it seemed to be so universal that it reminded me of a good old Irish lady I once knew, who described a serious attack of typhoid fever she indulged in one summer in the following words: Sure, I was sick for six long weeks in the month of August and me only cry was water, water.

Well, we don't have to have a fever to need water but it doesn't take long to get all hot and bothered without it. Some of the states have enacted rather drastic laws pertaining to water. Utah courts have given protection to present users of underground water. Colorado has a law which states that all underground water which would flow into a stream, if unimpounded, is subject to the same law as a surface stream. New Mexico now has important cases pending in the supreme court of that state on underground water rights. New Mexico also requires a \$5000 bond be posted before a well can be drilled.

**Draft Bill**

With W. O. Wagner, secretary, Irrigation Districts association of California, acting as chairman, a bill was drafted which will be presented to the United States congress at the next session, which will provide federal aid in the refinancing of several irrigation districts. This bill provides for a low rate of interest and long term bonds. It also covers drainage districts, flood protection, etc. The legislative program and many other equally interesting topics were discussed, and plans formulated in the furtherance of their development, but time will not permit our dwelling on them. Copies of addresses and papers, together with findings of group conferences and resolutions passed, will be compiled and mailed to the various states and counties requesting same, by the American Farm Bureau federation.

**Describes President**

I cannot resist telling you something about Mr. Thompson, because as I see it, to give an account of a Farm Bureau gathering at which

### HOW WELL CAN YOU CAN?

If you can, and can can as well as you think you can, then you have a chance to prove yourself the best canner in the United States by entering the Household Science Institute's canning contest to be held in Shenandoah, Ia., this year. Can something, send it to the contest quarters before October 1, and you may win first prize of \$600. Dr. Louise Stanley, right, of the U. S. Department of Agriculture, and Mrs. Grace Viali Gray, food expert, are examining some entries below.

Sam H. Thompson, president of the American Farm Bureau federation, was present and made special reference to it would be analogous to a hungry man ordering dinner and overlooking the entrée, because Mr. Thompson is the meat of the American Farm Bureau federation. I do not wish to infer that the Farm Bureau is a one-man organization, as such be far from the truth because the Farm Bureau is bigger than any individual ever could be, and furthermore, I do not care to detract from the other capable and outstanding men at the head of the various departments, but there must always be a leader. I want to give you a short description, or word picture of this man as I saw him. My first impression was that he is a sort of combination of David Hare and Abraham Lincoln; full of wit and humor, tolerant, humble, kindly, unobtrusive, boyish, almost shy and yet when called into action his force, intense earnestness and domination fairly stills opposition. A man ripe in experience, wisdom and understanding. A man entirely devoid of personal ambition or self aggrandizement.

An authority whom President Hoover has invited into his confidence time and time again as Alexander Legge, chairman of the farm board at Washington. A true son of the soil with gnarled hands, a salt of the earth individual with a wealth of knowledge, shrewdness and sheer ability. A bulwark of strength to our organization. And lastly, a man who has made a success of his own business. I feel perfectly confident and at ease as to the welfare of the Farm Bureau as long as Mr. Thompson remains at the helm because here is one real honest-to-gosh big man. You know, at this very moment I have a feeling somewhat akin, I imagine, to a "doughboy" receiving a decoration overseas from a very voluble, demonstrative people, but if I had any more appropriate descriptive adjectives, I certainly would feel justified in using them even though it does possibly lack dignity. However, right here and now I want to apologize to Mr. Thompson for this very wordy description of him, because he would be painfully embarrassed, he's that kind, but folks, I wanted you to know the type and character of the head of our organization that you too might enjoy that feeling of security, reassurance, and confidence as do I. There is no personal flattery intended.

**Orange County In Lead**

And now in closing I want to say something relative to California and Orange county's Farm Bureau progress as compared with other western states. I appreciate that comparisons are odious and are in extremely poor taste. However, on the other hand comparisons are the only yard stick whereby it is possible to measure the effectiveness of two similar organizations and I believe the Farm Bureau people of this state and county would be interested to know that their organization has advanced to a position far in the lead in Farm Bureau activities. You have a legitimate right to be more than proud of your organization because it is without doubt the best organized, efficient, active vehicle in promoting affairs agricultural of any state in the west, and is recognized as such. Now the one outstanding reason for this, I believe, the fact that it is adequately financed. Money not only talks but it labors indefatigably if there is enough of it, and brains to guide it in the proper channels of activity.

**TARIFF PROVES GAIN**

The recent tariff act is a distinct gain to agriculture, believes Arthur M. Hyde, secretary of agriculture. He says: "It affords the farmer of America adequate breastworks behind which he may, if he will bring his production within the operation of the law, find profitable protection."

**SOYBEAN POPULAR**

Soybean meal is becoming popular with poultrymen as a feed. This meal is valuable as a protein supplement for growth and egg production, according to the U. S. Department of Agriculture.

**TELL DISEASES OF POULTRY IN NEW CIRCULAR**

BERKELEY, July 26.—"Diseases and Parasites of Poultry in California," a publication that treats of all the common ailments to which poultry in California are liable, has just come from the press at the University of California as agricultural extension service circular No. 3. The publication was written by Dr. J. R. Beach of the veterinary science division, and Dr. S. B. Frechorn of the entomology division of the College of Agriculture. The circular may be obtained free from the college at Davis or Berkeley, or from any farm adviser.

"There are a number of diseases and parasites which may attack poultry and cause severe losses," write the authors. "The modern practice of raising large numbers of fowls continuously on relatively small areas has increased the likelihood of their occurrence. It is, therefore, of the means of recognizing, preventing and controlling the more common diseases and parasites is of great importance to all poultry raisers."

**Prevention Best Cure**

"The most effective means of combating diseases and parasites of all species of animals is to prevent their occurrence. This principle is especially applicable to poultry because fowls are commonly kept in such large flocks that disease may spread very rapidly and cause considerable losses before it is recognized. Furthermore, the value of a single fowl is so small that it is impractical to administer individual treatment to many sick ones."

**Treatment Method Outlined**

The authors describe general preventive measures, such as quarantine, feeding yards, houses, isolation of sick fowls, examination of dead birds, cleaning, disinfection, etc. Symptoms and methods of treatment are outlined for many diseases and parasites, including chicken pox, infectious bronchitis, colds and rube, nutritional roup, ruptured yolks, fowl cholera, fowl typhoid, tuberculosis, coccidiosis, pullorum disease, leg weakness of chick, turkey blackhead, lice, mites, ticks, fleas, flies, tapeworms, fourworms, cecum worms and gizzard worms.

**Water Pressure Is Best Aid For Fires**

Modern farmers are fast realizing that one of their best aids toward the prevention of damaging fires to home and farm buildings is the installation of a pressure water system.

"One out of every 50 farms in the United States suffered a fire loss last year," C. G. Wood, general manager of the Auto-Prime Pump company of Cleveland, said. "Much of the losses could have been averted had farmers been adequately prepared to fight these fires."

"The old bucket brigade has always proved ineffective and the fire extinguishers are soon exhausted. Only a steady stream of water can be effective to fight a fire," he says.

**ROAD MART PROFITS**

Farm men and women operating 30 roadside markets in North Carolina last year, sold \$302,390 worth of surplus produce from their gardens, poultry yards and pantries.

**MAY BE IRRIGATED**

An area of 13,000,000 acres in the arid and semi-arid regions of the Rio Grande and Colorado river valleys will be irrigated eventually if the available water supply is controlled and utilized efficiently, according to a bulletin just published by the U. S. Bureau of Public Roads. These rivers contain enough water to irrigate that number of acres.

Farm men and women operating 30 roadside markets in North Carolina last year, sold \$302,390 worth of surplus produce from their gardens, poultry yards and pantries.

**MAY BE IRRIGATED**

An area of 13,000,000 acres in the arid and semi-arid regions of the Rio Grande and Colorado river valleys will be irrigated eventually if the available water supply is controlled and utilized efficiently, according to a bulletin just published by the U. S. Bureau of Public Roads. These rivers contain enough water to irrigate that number of acres.

MUTT AND JEFF—It's News When a Tourist Bites a Guide

BACK THERE IS THE SOLDIER'S MONUMENT—TURN LEFT THROUGH SCHOONER'S FARM TO THE PLANK ROAD—TURN RIGHT TO OSCAR'S CORNERS—AND LEFT TO JUNG GROVE— IF YOU SEE A COVERED BRIDGE DON'T GO THROUGH IT BECAUSE YOU AIN'T GOING RIGHT— FOLLOW A RED COW TO SMITH'S FOLLY— BUT YOU CAN SAVE SEVEN MILES BY TAKING A TRAIN!

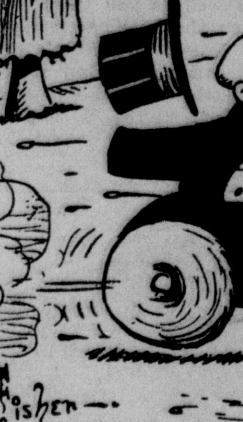

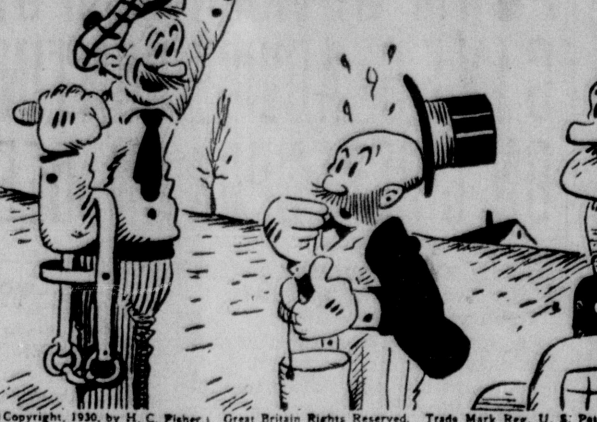

TOURING IS GREAT. CAN YOU REMEMBER WHAT THAT GUY SAID, MUTT?

JUST LIKE A POLITICIAN REMEMBERS AN ELECTION PROMISE!

CANADA? IT USED TO BE NORTH BUT I THINK THEY CHANGED IT ON THE 1930 MAPS. YOU GO THIS WAY ON THE SUNKEN RIVER ROAD TO JOE'S HOTEL—TURN LEFT AT A GREEN BARN TO TURKEY POINT— THEN RIGHT TO THE HAUNTED CAVE— AND LEFT TO THE FLOATING ISLAND— THEN RIGHT— AND TWO LEFTS— AND THEN ANOTHER LEFT!

WHY ARE YOU GOING THIS WAY, MUTT?

I LIKE THE FIRST GUY'S DIRECTIONS THE BEST!

15 Help Wanted

MAN wanted to keep yard clean in exchange for place to batch. See Wedell, 2088 No. Main.  
WANTED—Five neat appearing men work in Santa Ana. Address D. Box 183, Register.  
I WILL STAY with your children days or evenings. A mother's care. Phone 717-7.  
EXP. widow and housekeeper for elderly people, motherless home, ranch cooking. Phone 710-J or 455. 455 East Chapman St., 214 Pacific Bldg., 3rd and Broadway.  
THE Orange County Business College, Third and Ross St. Will train you in the shortest possible time for bookkeeping, shorthand and typing positions. Call or Ph. 960. McCORMAC SCHOOL, 706 No. Main. Trains For Better Employment.

17 Situations Wanted

(Employment Wanted)  
EXPERIENCED housekeeper wants work in Santa Ana. Address D. Box 183, Register.  
I WILL STAY with your children days or evenings. A mother's care. Phone 717-7.  
EXP. widow and housekeeper for elderly people, motherless home, ranch cooking. Phone 710-J or 455. 455 East Chapman St., 214 Pacific Bldg., 3rd and Broadway.  
HOUSEKEEPING by capable young woman, with 8 yr. old daughter. Inq. at C. N. Frank's, 14 ml. No. Garden Grove on Euclid. Write Pearl Duffrin, Garden Grove.  
WASHING, ironing, 1207 E. 2nd St. Will wash, dry, call for and deliver 20 lbs. washing for \$1.00. Quick Service Laundry, 437 5th St. Flat. Phone 722.  
Finished 55 pieces, 43 50¢ flat. Quick Service Laundry, 437 5th St. Flat. Phone 722.  
WANTED—Day work. Efficient, neat and quick. Phone 938-W.

18 Situations Wanted

(Employment Wanted)  
PAINTING, Papering, Tinting, Patching. Phone 4149-W.  
EXPERIENCED auto mechanic wants work. Hour, day or week. T. Box 92, Register.  
PAINTER, painting, tinting, patching. Phone 4149-W.  
Jack Taylor, carpenter, cabinet work, furn. repair, 342 W. 18th St. Phone 4149-W.  
RELIABLE window washing, cleaning. H. A. Rosemond, Ph. 485-R.

SCHUCHARDT'S HOMER DEFEATS SANTA ANA, 5-4

(Continued from Page 10)

Valencas a real foothold in the fourth inning during which they made three runs without driving a ball out of the infield.  
Preble started and ended it all. He bunted perfectly in front of the plate and beat it out with ease. Moody did the same thing and was safe when Wilcox and Cornelius hit the ball roll, thinking it might go foul. They didn't have a chance to get Moody anyway for the ball was well placed down the first base line.  
Rockwell bunted too, but Touel picked it up and tagged him, the runners advancing to third and second. Bill Bushman grounded to Merrill and Preble scored while the Santa Ana second sacker was retiring Bushman at first.  
All Bushman then singled off Scott's glove at third base, and Moody scampered across.  
Cornelius passed Schuchardt and Murry, filling the bags, and Phil Schrott's high bouncer went for an infield single and scored Al Bushman.  
Preble ground out to Cornelius and ended the agony.

Stars Score Twice

The Stars were still in the ball game, however, and they got to Bushman for a couple of runs in the sixth, enough to make the count 4-3.  
Hill beat out a perfect bunt just to the right of Bushman as a starter. He went to second on a wild pitch. Herrill filed out but Bell singled sharply to center and took second on Schuchardt's throw-in. The ball was so well smacked that Hill, thinking it might be caught, had to stop at third. Nelson's line drive was too hot for Murry who tried to knock it down and hold it to a single. Bell, reaching third on the play, scored while Preble was throwing Lutz out at first. A wild pitch put Nelson on third but he perished there as Cole grounded out.

Santa Ana had the valuable assistance of John J. Luck to tie the score in the eighth. Merrill hit a high pop fly which Shortstop Murry apparently lost "in the sun" as he looked up into the glare of the electric lights. It went for a double. Merrill promptly stole third after a short passed ball. Bell walked on four straight balls. When he started to move up on the first pitch to Nelson, Catcher Bill Bushman bluffed a throw for him and then tossed to third in an effort to nail Merrill off that sack. Phil Schrott let the ball hit him in the leg and bounce away and Merrill scampered to his feet to score the tying run. 4-4. Bell went clear to third but was called out by Base Umpire Nunn for assertedly leading first base before the pitch had passed Nelson. That decision cost Santa Ana a run for Nelson followed with a terrific drive to deep center which Schuchardt caught after a hard run. Bell could have faked home after the catch.

The box score:

	Santa Ana	AB	R	H	P	O	E
Hill, ss.	4	2	2	3	0	0	0
Murry, 2b.	4	2	2	2	0	0	0

NEW YORK CURB

Quotations Furnished by Bacon-Wardell & Company, 107 W. Sixth St., Santa Ana, Calif. Phone 4066—Mgr.

## EVENING SALUTATION

"When boards get done talking about farm relief the farmers will do something about it."—Henry Ford.

## THE NEW BOULEVARD

Today a new boulevard joining North Broadway and North Main streets directly with the Manchester boulevard is to be opened. This makes a more direct routing into almost the heart of Santa Ana than does any other artery. Unquestionably this will help the traveler on his route from Los Angeles and the north to San Diego, and it will be of marked benefit to the people of Santa Ana from a business point of view and from the view of the Santa Ana desiring to reach points on the Manchester and Whittier boulevards.

Other things being equal, roads make cities. The greatest cities of the world have been planted where they have grown because they were on the main highways through which the travelers were bound to pass in whatever period the city was formed. This is true of Venice, of Rome, of London, and of Edinburgh. The great cities of our own continent were located where they are because they were on the natural highways. Boston, New York, Philadelphia, Albany, Cleveland, Chicago, St. Louis, Cincinnati and all the rest evidence this. These were located primarily on waterways because in the period of their founding and early growth, the water was the main highway through the wilderness.

With the building of the railroad and the perfection of the roadbed of the highways, cities have sprung up away from the water. Routes for commerce and social life are no longer dependent upon those primitive means of transportation. So it is that every new road into any center of activity is bound to increase the importance and growth of that community. Roads bring people closer together. They are the most patient, inviting, value-effecting, socializing institution which we have.

They are always ready. They never desert you. They never haggle or dispute, and their importance is so well known that a large portion of the money paid through various forms of taxation is devoted to the building now of highways.

So Santa Ana is to be congratulated on the opening of this new road. Regardless of opinions as to whether this new road is more important than some other that might have been designated or enlarged or improved, there are tremendous advantages which will be gained from it, and those who are responsible for it, the leaders of the Chamber of Commerce and the City Council are entitled today to all the honor which can come from this celebration.

The greatest thing in the world is to establish proper relationships between individuals and communities and nations. Communication and transportation facilities do this, and the council and the chamber of commerce are working along the lines of the highest law of spiritual values, as well as of commercial gain, when they build and improve the roads enabling people to more constantly and quickly mingle and exchange the products of their minds and hands.

Why go to the zoo to see the elephants when you can hear them walking around in the flat just above?

## THE BOSS "CONCEDES"

This is a time when rumors are ripe and speculation is general concerning candidates. There is an impression that there is a more or less close alliance between office-holders in the court house and a determination by them to adhere pretty closely. The South Coast News of Laguna Beach under the heading "The Boss Concedes This," speaks as follows:

One who is in many quarters esteemed as the political boss of Orange County is quoted as having said that there would be just one new face in the court house after November.

One might ask, Why concede this one? Or, one might even go so far as to ask, How does the gentleman know? How can he in such detail forecast what will happen? Is the grip on the county so secure, so certain, so absolute, that it is possible to make and unmake office holders?

These are but speculations. Maybe the gentleman who is supposed to hold the reins of government in his unofficial hands knows his voters. Maybe he has inside information, has sources which are so reliable and so authentic that it is thus possible to state with accuracy two elections ahead of time what is to happen.

If this be so, why go to the expense of an election?

Of course there will be those scoffers who will say it is mere boasting, just bravado, a good front.

It lies in the hands of the voters to demonstrate whether or no this county is thus controlled, whether it is within the power of one man to say with authority what several thousand voters will do.

Those candidates for office who are not incumbents will be inclined to doubt this statement of no changes. So will their friends. If those in office put up a stiff fight, it will tend to prove that they, too, are not altogether assured of the correctness of this forecast.

We fear our esteemed contemporary, the "South Coast News," is not fully up-to-date, for we believe it is now granted that there is more than one change that is very certain in the court house and we are rather impressed that there is not as close unity among the so-called court house candidates as some have been led to imagine. The truth is that unquestionably one at least of the candidates in the court house is being attacked not by the people generally by any means, but by a political gang which seems to have been unable to control him and is bent on his destruction.

## HENRY FORD'S EDUCATIONAL IDEALS

The Wayside Inn, which Longfellow made famous in his "Tales of the Wayside Inn," has been turned into a trade school, subsidized and controlled by Henry Ford. The versatility of Mr. Ford is amazing. Without education and with no culture, he has succeeded in about every enterprise he has undertaken. He takes an abandoned coal mine and makes it pay. He knows nothing about the steel business, but he begins and makes it pay from the start. His main enterprise, the making of automobiles, has made him one of the richest men in the world. Now he is trying his hand at running a school.

In this particular trade school which he has started in the Wayside Inn in Sudbury, Mass., he not only teaches the trades, but he makes fundamental the ability to market the products which these students are being taught to make. It is one thing to make a thing; it is quite another to find a market for it after it is made. There are many things made which do not deserve a market, and probably will never find one. But a thing that is worth making, and which meets a human need, is deserving of the best ability to find a market for it.

Henry Ford may not know much history. But knowing history is not the whole of a business man's equipment. It is a matter of observation that the bookish man as a rule, is not a good business man. The two do not seem to go together. Still, we have an idea that if Mr. Ford could have had a college education, he would still be the successful business man he has become. Nevertheless, there is a native ability in Henry Ford which could never have been acquired had it not been inborn. His basic philosophy is sound in education. A man must be able to produce; but he must be able to find a use for the thing he has produced.

An automobile is the first thing about most any city that strikes you nowadays.

## CIGARETTE SMOKING INCREASES

The Internal Revenue department is authority for the comparative figures between the sale of cigarettes in June, 1929 and sales last month which reveal that almost a billion more cigarettes were sold last month than a year ago. Cigar consumption fell off considerably. These two facts would indicate that men are not smoking so much and women are smoking more, for few women smoke cigars. And on the other hand some men, and the number is increasing, are giving up smoking because it is effeminate. It may also be that through having the opportunity, afforded by the ladies to "see themselves as other see them," they have decided to quit.

Figures are also given for the consumption of snuff and it is surprising the quantity that is sold when most of us believed that the use of snuff was a quite obsolete custom. The sales of snuff this last June were 2,872,584 pounds, a year ago they were 3,287,200 pounds.

## British Censor and a Great American Play

On the ground that misery loves company, Americans are likely to cherish secret satisfaction when censorship in other countries also seems to border on the stupid. Some of the less informed are likely to be surprised when such instances remind them that censorship is not an exclusively American institution, centering in Boston, or left in the hands of police sergeants. In the British stage censor's ban on "Green Pastures," the well-informed will recognize a concession to the British tradition of reverence to sacred things.

From the American point of view "Green Pastures," the outstanding play of last season and the winner of the Pulitzer prize, is not irreverent. Those who have seen it, read it or read about it recognize in it a profound expression of the spiritual side of the negro character. But to a public which knows the negro only from the music hall stage, "Green Pastures" might easily seem to be a ribald travesty, offensive to the deep and ordered religious sense of the English people.

Censorship at best is apt to be narrow and arbitrary. Lord Cromer may have made a mistake in withholding "Green Pastures." But the grounds he is presumed to have taken are higher than those on which certain American censorship, largely self-appointed, has acted with regard to the circulation of established classics of literature.

Guarding a national religious tradition from offense is quite different from protecting individuals from literary contacts which they themselves seek. The differing American and British points of view on "Green Pastures" only bear out the old maxim that one man's meat may be another man's poison. And the British censor is responsible only to the British people.

## Tourists Are Many, Spend Much

Tourists are coming to Southern California every month in the year. There is no tourist "season," restrictively speaking. All seasons, in other words, are marked by tourist travel here. This year finds great numbers of welcome visitors from other states and sections, coming into this Southland. They are coming from every mode of transport now in vogue—by railroad; by steamship; by air; by motor bus; and in their own automobiles.

There is this gratifying fact about the tourist situation. There never before were so many different and inviting modes of transport leading into Southern California. And never before was this Southland advertised so extensively and persistently, or so skillfully and intelligently. This latter factor counts for much. Tourists and travelers are intelligent, discriminating connoisseurs. They cannot be lured or influenced by tawdry, extravagant, uninformative, disgusting ballyhooing. The All-Year Club of Southern California is placing promotional advertising for this section so ably and so cleverly written that the most sophisticated globe-trotter must note and read it. The railroads employ their most capable ad writing experts to lay Southern California's case before tourists and vacationists. The steamship companies likewise. And the air transportation companies also are doing some fetching advertising. The motor stage lines are recognizing the value of good advertising.

Note this, too: automobile manufacturers are helping out by attractively advertising their cars as means of transport to these vacation and sight-seeing wonderlands of the West.

## That's Not The Half Of It!

## More Truth Than Poetry

By James J. Montague

WORTH TRYING ANYWAY

I know that the person who gathers vast wealth  
By toiling as hard as he can,  
May speedily part with the blessings of health  
And die a deceitful old man.  
Far better be poor and be rugged and strong,  
As our journey through life we wend  
Than vie with a greedy and ravenous throng  
For money we never spend.  
Worth more than the prize is the cost of success,  
But I envy the prosperous, nevertheless.

I know it is wiser to eat meager fare  
Than to dine at an epicure's table;  
Cheap clothing is fully as healthful to wear  
As the costliest cashmere or sable.  
The blessings of money are much overpraised  
Great fortunes can seldom endure,  
The rich, I am sure would be vastly amazed  
At the fun that is had by the poor.  
But if I controlled my terrestrial lot  
I'd have a great house and a big white steam yacht.

I have seen many haggard and feeble old lads  
Who labored great fortunes to gain,  
And gathered the glittering dollars in scads  
Broken down by the struggle and strain.  
But though I am more or less husky myself  
I would take a long chance, here and now,  
To hustle like they did to gather in pelf  
If I just had the wit to know how.  
And if I broke down in the arduous quest  
I'd go over to Europe and take a long rest.

WHY COMPETE WITH HIM?

We feel pretty sure that when better golf is played, Bobby Jones will play it.

DANGEROUS PRECEDENT

We are told that a famous film star and his wife were about to separate. Somebody should persuade them that other film people are likely to follow their example.

TOO LEARNED

A couple of New York judges are now defendants in criminal actions. In their cases, apparently, familiarity with the law bred contempt.

## Puritan Ascendants

By WILLIAM TRUFANT FOSTER and WADDILL CATCHINGS

The descendants of the early Puritans are this summer celebrating the three hundredth anniversary of their arrival on the bleak shores of New England. High-minded men and women were these pioneers. "But their descendants," says a writer in The Living Age, "have long since reduced THEIR conception of life to a mere process of consumption and production."

This is said news. The art museums, libraries, symphony orchestras, and other cultural bequests of the Puritans have gone, we take it, to join the glory that was Greece and the grandeur that was Rome. All their descendants think about are animal activities.

The early Puritans themselves were not entirely unconcerned with such low matters. Historians refer to their lapses as "wresting a living from the soil." So frequently did they toss this subject of making a living an earnest thought, that "wresting" was practically the only kind of rest they knew; all because they cherished an unholy lust for food, shelter, clothes, and meeting houses!

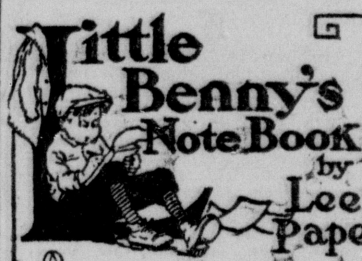

Even public servants were not immune from this mania. Justice Cushing of Scituate regrettably refused to become Governor of Massachusetts because, on \$800 a year, he could not properly feed and clothe this family.

The Puritans were fine people. But so are their descendants. There is no reason why they should creep through life with the accent on their descent. Indeed, in standards of living they have made a notable ascent.

It is nothing to be ashamed of. Three hundred years ago even the holiest Puritans came into this life automatically producing a yell and thankfully consuming what they got in return for it. Most of them went struggling with some phase of the production-consumption problem till they departed this life. The fact that their great-greats are still wrestling with it would probably stir the early Puritans to nothing more than a sigh of sympathy.

Unless they happened to overhear some light-minded descendant refer to the serious business of producing and consuming as a "mere process." They would turn over in their graves!

(Copyright, 1930, McClure Newspaper Syndicate)

Pop was smoking to himself and ma was reading the paper, saying, The automobile show opens tomorrow, Willyum.

Well inasmuch as we have neither a car nor any intention of buying one, that news item comes under the head of unimportant information, pop sed, and ma sed. Well anyway the paper is full of the most attractive ads about the different cars that are apparently going to have different displays. For instance listen to this about the Golden Swallow. It says, Don't fail to see the Golden Swallow, Booth Number 31. It may truly be sed, with its Smedly upholstery, its Brookman accordeon springs and its Swallow vibrationless motor, that at 90 miles an hour in the new Golden Swallow you scarcely realize that you are in an automobile. Duzzen that sound just wonderful? ma sed.

Not to me, pop sed. I dont see any particular sents in paying a fancy price for a car and then not even realizing that you have one, he sed.

And heers an ad for the Skipworth, ma sed. It says, When you stop at Booth 13 and see the 1930 Skipworth you will go no farther. It is literally impossible to go beyond the 1930 Skipworth.

Is impossible for me to go beyond it for the simple reason that I'm not even going as far as it, pop sed.

Well now Willyum just going to the automobile show duzzten necessarily mean to imply that you unavoidably must buy a car, ma sed. I reely think we awt to go, Willyum, he sed, and pop sed. I knew it, I knew that what you were leading up to. I respectfully decline the nomination, he sed.

Meaning he wouldnt, and ma sed. O well, the show is going to keep open for a whole week.

Proberly meaning she had a whole week to argew pop into going.

Wich she proberly will.

## In the Long Ago

From the Register Files  
14 Years Ago Today

JULY 26, 1916

Thrown to the hard pavement and pinned under his automobile when it turned over as the result of a collision in Anaheim yesterday afternoon, George McPhee, county sealer of weights and measures, escaped with no more serious injuries than severe bruises.

Mr. and Mrs. Horatio J. Forgy of 808 Bush street were hosts yesterday evening to a small coterie of their friends at an informal and delightful dinner party. Among those present were Judge and Mrs. W. H. Thomas and Mr. and Mrs. Harry Lewis.

Two occupants of the Orange jail last night gained their freedom when they made a hole in the roof and escaped.

J. L. McBride will be one of the speakers when the entertainment for the benefit of the needy families of the members of Company L is staged Friday evening. If he arrives here in time from Nogales.

Fred Ross, sales manager for the W. F. Lutz Co., agents for the Studebaker, has reported the delivery this week of a Studebaker "Six" to W. L. Leiby, of Tustin.

## Thoughts On Modern Life

By GLENN FRANK

## ART SPEAKS TO BUSINESS

In an out-of-the-way column of my morning paper, I find a statement about art that seems to me to give sensible and statesman-like advice to the governors and guides of the economic life of America, in particular, and of the Western world, in general.

Otto H. Kahn, extraordinary business genius and exemplary art patron, is speaking.  
"I believe in decentralization in everything," he says, "in government, in business, and in art."  
Mr. Kahn is commenting upon the two projected performances of the Metropolitan Opera Company in a suburban center outside New York.

"It is too much to expect," he says, "in the rush and hurried life of today and the preoccupation that is attendant upon that life, that the bulk of the people who live in suburban communities will go home to dress after a busy day in New York and return again in the evening to attend concerts and operas and then rush off to make the last train home. The vast numbers of people who live in suburbs should have art accessible to them. They are particularly responsive to it because they live in surroundings which stimulate peace of mind, and peace of mind is one of the

essentials for the enjoyment of art."

For a generation, in all our industrialized countries, everything has moved towards the center. The city has increasingly absorbed the country.

The little business has given way to the large business. The individual has been encroached upon by the group. The pendulum may swing back. Great cities cannot permanently endure if the rest of the country suffers a too drastic folk-depletion.

There is a point past which bigness of organization becomes a liability rather than an asset, a contention that was brilliantly and conclusively argued by Mr. Justice Brandeis years ago before he ascended the bench.

Profits grow insecure when the bigness and complexity of business organization outstrips the managerial capacity available.

Life grows intolerable in the city that has raced rapidly into unmanageable bigness. The Metropolitan Opera Company leaving, even for a time, the social sanctity of the Golden Horseshoe for a journey into the suburbs may be a prophetic symbol.

## OUR CHILDREN

By ANGELO PATRI  
PETTING CHILDREN

"Coming, Mary?"  
"No, I'm sorry, but I can't leave Sammy. You know I've never left him."

"But your mother is here. And his father. What's the idea? We expected you to go with us. You haven't been out of the house for months. The child is perfectly well. Why can't you take an afternoon off?"

"I'd like to but I simply can't leave Sammy. I can't take him along so I must stay with him."

Aunt Ellen grunted, started the car and rolled away to the annual club meeting grumbling all the way. "Mary is making herself a martyr for that boy and he doesn't know a thing about it. He's four years old, perfectly happy with his playthings, adores his father and grandmother and yet she won't leave him for an afternoon. It's plain silly, that's what it is."

Mary is the kind of mother who will say when the teacher asks her to send her boy to camp for the season, "He couldn't go without me. He has never been away from me for a single hour since he was born," and never dream that is the reason the teacher is beginning for a season of absence for the child.

Some close personal care is necessary for every child but one must measure the need and the supply with nice discrimination.

How much can I get the child to do alone? How can I reduce my supervision and my help to the lowest possible amount? How much responsibility can I put upon the child without overdoing the matter?

Of course it all depends upon the child. Some children grow fast in independence. Some grow very slowly. And some, it is said to say, never grow to self-support, try as we may to help them.

Fortunately such tragedies are the exception. Normal, healthy children, trained by the restraining hand, watch for a chance to enjoy a breath of freedom. All they need is a little encouragement and the opportunity to help themselves. But we must begin early—even when the child lies helpless in his crib.

The baby will learn in a single experience that if he cries his mother will hold him in her arms and he prefers that to the mattress. The wise thing is to hold him as necessary, but not to let him understand that life is to be subordinated to him. Better begin early and instead of enjoying the thrill of feeling the child dependent upon us, rejoice in each sign of our uselessness.

Independence of personal care is a far prouder thing than clinging to mother.

(Copyright, 1930, The Bell Syn., Inc.)

## ON THE SIDELINES

Which may or may not be in accord with the views of The Register

By Horace McPhee

## OUTLOOK IS NOT SO BRIGHT

—That strange thing is done and said during election campaign! For instance and example, a few years ago a certain candidate for governor of California went up and down, over and across this good old state of California, appealing for votes, largely upon the ground that he knew nothing whatever of politics. When the votes were counted, on the evening of election day, the gentleman was found to be defeated.

Now comes Burton Fitts, of Los Angeles, a candidate for governor who promises to out Herod Herod, in his repudiation, disavowal, and disapproval of politics or anything thereto belonging or appertaining. More than this, he will, if elected, put an end to politics in and for the state of California. At least he says he will. At a meeting held at Santa Paula on the 16th instant Mr. Fitts said he would, if elected, so conduct the state government as to "eliminate politics entirely."

And Webster—more or less well known for his correct knowledge of the meaning of words, defines the word politics as the "science and art of government."  
Granting, for the sake of argument, that Mr. Fitts, if successful, will do that which he promises, the outlook does not seem particularly bright.

Knows His Astronomy  
Mayor Ralph of San Francisco may be, as indeed he is, the chief executive of the "wettest city in the United States," but just now he is making his appeal to quite another class of citizens.

He has gone up and down, over and across the northern part of the state taking part, as a major contender, if you please, in milking contests.

In political matters Mayor Ralph is, and for many years has been, a star. Why should it cause surprise to know that he is informed as to the milky way.

## He Knew His Bible

Czechoslovakia, as it appears, has a compulsory voting law under which the citizen has to go to the place of voting and vote.

The system received a shock at the recent election in Gablonz, when a citizen, evidently tired because he could not show by abstention his indifference to the candidates, wrote across his ballot: "Isaiah xii, 24." The election judges consulted a Bible and read: "Behold, ye are of nothing, and your work of naught; an abomination is he that chooses you."

Time For Action  
The San Francisco Chronicle, which is filled with good and timely suggestions, calls the attention of the new Association for the Rights of Men to a case which clearly comes within the purview and province of that organization. The story is a relation of the case of the New York citizen who broke his arm when he was one of several men to jump through a window.

An all night poker party had progressed only to 9 o'clock in the morning. Suddenly a woman burst into the room demanding, "Where is my husband?" Fortunately the apartment was not on the nineteenth floor and only one of the fleeing men—and he not the husband of intruder—was badly hurt.

The Chronicle writer, who is evidently "on the inside," as it were, suggests that the association should get through a constitutional amendment fixing the time limit of interruption not earlier than 11 a. m. and providing that a woman who breaks in must first send in her card and state specifically which husband she is looking for.

"Now is the time for all good men."
